That's a good plan, consistent with moving south/southwest towards the Snake River, presumably the general direction of ground water flow in that area.

Good save for this one!

Subject: WSB Rental Substitution Proposal-Montierth.xlsx

Steve,

I reviewed the location of the leased rights proposed to replace Right 61-10841 in the Montierth rental. See attached. It appears that the leased rights are located in Cinder Cone CGWA (1) or Mt. Home GWMA (2). The Montierth rental POD/POU is located to 2 townships south also in the Mt. Home GWMA. The rental would move the diversion of these rights away from the CGWA nearer to the river, but still within the Mt. Home GWMA.

Looks like this should be okay. Do you see a problem with this proposed move?

Pam
