RE: Amendment for Licensing

Dear Mr. Beutler:

Thank you for assisting me with the field exam for Permit 13-7512. I apologize that it has taken me so long to get these documents to you. As we discussed during the exam, because the newer ground water well was developed in a different location than the one described on the original permit, the permit has to be amended before a license can be issued. I have prepared an amendment for licensing purposes for you to review. The amendment adds a second ground water point of diversion and describes the correct location of the two city wells.

If the Application for Amendment correctly describes the changes to be made to the city's permit, please sign the application (highlighted in yellow) and return it to our office. Feel free to keep a copy for your records. The filing fee for a licensing amendment is \$100.

I have also included a draft of the license that will be issued. I am proposing to issue the license for the full diversion rate of 3.00 cfs. The evidence available to the Department at this time suggests that Dayton was able to develop the full 3.00 cfs before the well was damaged. The authorized place of use for the water right will continue to be the city municipal service boundary.

Once we receive the signed application for amendment and the filing fee, we will move forward with issuing License 13-7512. It should take less than a week. Feel free to call if you have any questions about the field exam report or the draft license.

Sincerely,

James Cefalo
