Re: Reissue License

License was issued on July 22, 2008. Petition for Reconsideration was filed by attorney Randy Budge on behalf of John & Julie Franson on August 12, 2008, arguing that an irrigation element should have been included on the license. Petition was granted and license was withdrawn by order, August 15, 2008. Petitioners were given 60 days to provide evidence of irrigation taking place during development period. No evidence was ever provided. In a phone conversation in August 2013, the current owner, John Franson, confirmed that he is no longer interested in pursuing the irrigation component and the license can be re-issued in its original form.
