Re: Application to Rent Water (Basin 61).

Dear Nick:

The production from the irrigation wells described under water right no. 61-7088 is rapidly deteriorating. In an attempt to complete the 2013 irrigation season, we want to divert water to supplement 61-7088 under three of the points of diversion described under water right nos. 61-2162 and 61-2163. Water right nos. 61-2162 and 61-2163 are currently leased by the J. R. Simplot Company to the Water Supply Bank.

Because the wells under 61-2162 and 61-2163 are near the irrigation system for the place of use described under 61-7088 they can become an excellent source to supplement the declining production under 61-7088, with some plumbing. The place of use under 61-7088 will be the only land irrigated. None of the place of use described under 61-2162 and 61-2163 will be irrigated during 2013.

Please accept the enclosed application to rent water from the water supply bank.

Sincerely,

Vic Conrad
Land, Water & Asset Recovery
