Water Right Application Narrative

Milton K @ Gloria H. Eberhard

We wish to appropriate .06 cfs of waste water for irrigation purposes on approximately three acres of our property. The water would irrigate dry pasture, landscaping and riparian habitat that is not irrigated at this time.

The intermittent waste water originates during the irrigation season from the Dick and Betty Morton and the Nancy Linell Bills properties.

There is a small, unmaintained ditch that drains excess flood irrigation from these properties. The water passes over a corner of our property and continues onto a separate five acre parcel listed under the Annette V. Bills Trust. Parcel RP 22N22E170602.

It is our understanding there are no water rights filed for that property. There are remnants of small ditches and a portion of that property benefits from the waste water as evidenced by green pasture.

We propose to clean the ditch and use it to carry water to our property. A wooden head gate would be placed in the ditch to divert water to our property. We would make a continuation of the ditch on our property with small laterals for gravity or pump irrigation.

It is critical the waste water not be diverted prior to reaching our property since that would dry up existing riparian vegetation on our property. That is a possibility since the adjacent property owner to the East could file on the water and divert the water.

Sincerely,

Kirk @ Gloria Eberhard
