Subject: Petition to Reconsider Transfer No. 78654

Blake,

As we discussed on the telephone earlier today, please consider this email as a petition to reconsider the captioned transfer approval. We would like you to review and address the following issue:

Parent Right No.	New Right No.	Issue	Proposed Resolution
73-2053	73-12222	The correct description of the point of injection is SENW, S7, T14N, R22E. This is consistent with the transfer application and Attachment 7a of the application	Correct the point of injection on water right 73-12222.

We also discussed 73-12231, which I had erroneously associated with 73-114. This was incorrect, and the two sources listed on 73-12231 are correct. Water right 73-12231 is a child of 73-10037, which lists two sources: Patterson Creek and the Pahsimeroi River. Water right 73-114 lists Patterson Creek as a source, and the child of this right is 73-12227. Please let me know if that explanation is not clear!

Thanks again for your time and effort. We truly appreciate your willingness to go the distance and get these permits and transferred issued.
