The Idaho Department of Water Resources considers this form a statement by the permit holder(s) that development of a water right has been completed and that water has been applied to beneficial use to the extent described below. This form must be accompanied by an examination fee, when necessary, or by a completed Beneficial Use Field Report prepared by a certified water right examiner. Please refer to the instructions and fee schedule for this form. If ownership of the permit has changed, please contact any Department office or visit the Department's website at: www.idwr.idaho.gov for an Assignment of Permit form. If you wish to relinquish your permit because you have not established the authorized use of the water and are not applying for an extension, please notify the Department in writing.

Dear Ms Block,

A statement of completion for permit 13-7785 is included as well as a check as required.

A collection cistern has been built at the designated point of diversion. A 10 gpm submersible pump and control system is installed with protective enclosure and piping to a residence that is also complete. The residence has 54,000 gallons of water storage to accommodate summer periods when the water flow rate may be zero and winter periods when the stream is frozen as well as fire protection. The required water treatment equipment is also in place and is being used. Water has been used for building construction during the past year. Except for during winter water continues to be used for livestock.

Sincerely,

A handwritten signature in cursive script, reading "Carl Howlett".
