RE: Water Right Permit No. 75-07668

Dear Mr. Galligan:

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report and my review, the following elements were developed differently than were described on your permit:

☒ **Point(s) of Diversion**

☒ **Place(s) of Use**

☐ **Other**

The Point of Diversion was found to be located in NESENW and within H.E.S #544. However, it was advertised and described on the permit to be located in SESESW. Similarly, the Place of Use was found to be located in the SWSE and within H.E.S. #544 but it was advertised and described on the permit to be located in the SESW.

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within 14 days.

If you have any questions, please call me at 208-287-4946.

Sincerely,

Michele Edl
Associate Engineer
