

MEMORANDUM

Date: August 12, 2013
To: Transfer 78650
From: Blake Jordan
Re: Review & Evaluation of Sufficiency of Information

This transfer proposes to change the place of use for groundwater right 73-7025. Circle Pi, LLC is cooperating in conservation projects with state and federal agencies to provide additional flow in Sulfur Creek and the Pahsimeroi River located near their ranch. This is one of three transfer applications that have been filed simultaneously in response to these conservation projects. To provide more flow in Sulfur Creek and the Pahsimeroi River Circle Pi, LLC filed one ground water transfer (transfer 78650, water right 73-7025) and two ground water applications for permit (73-12219 and 73-12220) seeking to divert groundwater to irrigate a combined 263.5 acres within their ranch. The applicant proposes to dry up 263.5 acres under water rights 73-6, 73-12, 73-105, 73-107, 73-108, 73-114, 73-115, 73-2015, 73-2037, 73-2053, 73-10037 and 73-10063 to mitigate for the ground water diversions. Drying up 263.5 acres under the water rights will free up approximately 6.27 cfs of water to remain in the Pahsimeroi River. The water rights being offered for mitigation are 73-6, 73-12, 73-105, 73-107, 73-108, 73-114, 73-115, 73-2015, 73-2037, 73-2053, 73-10037 and 73-10063 which is described in transfer 78653. The nature of use for these water rights will remain as irrigation. A condition of approval will be placed on these water rights indicating that they are used to mitigate for the ground water rights. The place of use for the 263.5 acres being used for mitigation will fully overlap the place of use described under water right 73-7025 and permits 73-12219 and 73-12220.

Currently water rights 73-6, 73-12, 73-105, 73-107, 73-108, 73-114, 73-115, 73-2015, 73-2037, 73-2053, 73-10037, 73-10063 and 73-7025 (ground water) authorize the irrigation of 723.8 acres. After the proposed changes under transfers 78654 (97.7 acres), 78653 (362.6 acres for irrigation, 263.5 acres and 6.27 cfs for mitigation) and 78650 (106.0 acres; ground water), and the addition of two ground water permits (73-12219 and 73-12220), the total acres proposed to be irrigated remains at 723.8 acres.

Through this transfer the applicant is seeking to change the place of use for water right 73-7025 and combine it with permit 73-12220 to create a 258.4 acre place of use. This water right will authorize the irrigation of 106.0 acres within the 258.4 acre place of use.

Authority to File:

The applicant is the current owner of water right per IDWR record and owner of proposed place of use per Custer County taxlot data (updated 8/21/2012). Ben Yates who is the manager of Circle Pi, LLC signed the application.

Water Right Validity:

Decreed in 2009. Forfeiture is not an issue.

Injury to Other Water Rights:

This ground water rights is within future water district 170. The point of diversion will remain the same. This transfer was advertised and there are no protests.

Enlargement of Use:

No issues Identified.

Local Public interest:

No issues Identified.

Beneficial Use/Conservation of Water Resources:
No issues Identified.

Effect on Economy the Local Area:
No issues Identified.

Effect on Agricultural Base of the Local Area:
No issues Identified.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
