OOPs. Mailing address, huh!! These eyes didn't catch that.

My mailing address and that of DR6275 LLC is:

22496 Saunders Dr.
Sherwood, OR 97140

Please discard the Beaumead address.

And thanks for following up on the permit. We're pretty excited as you can imagine. The Bar None project is still waiting for the WQC which is out for comment. He doesn't envision there will be a problem and expects to issue it within a couple of days after August 21st.

I'm preparing to start the DR6275 LLC project by setting the screen in the stream next week. The Army Corp and IWRB have signed off. I have a WQC for this project on file for the original location. I believe it is still valid, at least my contact in Idaho Environmental Services did not object to it.

Thanks again,

Rol Evans

Good Morning again;

Would you please verify your mailing address for me? I have two addresses for you for some reason, I want to make sure the permit is correct when it comes out.

Thanks,

Kerrie Mathews

Good Morning:

There was a meeting held yesterday, the state office is working towards completion of the conditions for hydro-power permits. The issue seems to be with the larger power facilities. We requested that the Micro power projects like yours be separated, so we can move forward on those permits. The State office said they would try and get the conditions for those permits worked out asap. I don't have a time line to give you for when those may be ready.

The gentleman in Boise who is working on this is Shelley Keen, as soon as I know more information I will pass it on.

Thanks,

Kerrie Mathews

Hi Kerrie,

I hope you had some relaxing time when on vacation last week.

Just a question for planning purposes:

Do you have a timeline on processing the Power Permits, days? Weeks?

Thanks

Rol Evans
