RE: Water Right Permit No. 65-13873

Dear Permit Holders:

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit:

- ☒ Point of Diversion
- ☒ Place of Use

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within 14 days.

If you have any questions, please call me at (208)334-2190.

Sincerely,

KAY WALKER

Sr. Water Resource Agent

Subject: 65-13873
Attachments: Trough Photo.JPG; Deadwood Outfitters Stockwater 65-13873 Aerial Photo.docx

Sharla,

This is the information I have for permit 65-13873:

There is a headbox with water piped down to a faucet near the barn and a trough in the corral at Deadwood Outfitters.

Headbox: 44 d 27'52.28"N 115d 34'48.97" W

Barn Hydrant: 44 degrees 27'49.51"N 115 degrees 34'55.60" W

Corral Water Trough: 44 d 27'49.62" N 115 d 34'53.17"W

I do not have any GPS capability to plot these points. But looking closely at the maps it appears that the POUs may be in the SENE rather than the permitted NENE. I'll have to rely on your mapping to determine this. If a permit amendment is needed please let me know or send a prepared amendment to me and I'll get it taken care of.

I have also attached a photo from April 12th showing there is in fact a trough, some water and a lot of snow up there right now.

If there is anything else that is needed or that I've overlooked on this one please let me know.

Thank you for your patience.
