Subject: RE: Point of diversion water right transfer cancellation of 13-7634 water right

The email came through and I have added it to the transfer file. We will drop right 13-7634 from the transfer and move forward with just the two Bear River rights.

James,

Would you please cancel the transfer of the point of diversion related to the Water Hollow Creek right 13-7634 at this time and continue the point of diversion transfer of our water right 13-969A to our water right 13-7632 attached to the point of diversion on the Bear River. Thank you for your assistance in this matter.

Subject: Point of diversion water transfer

James,

How are you doing? I have been working out of town and just received a copy of the legal notice in the paper indicating our proposed point of diversion transfer of water. There is some wrong information in the notice. I only wanted to transfer the water from the 2 acres north east of our home that is attached to the AC Bosen water right 13-969A to our point of diversion on the Bear River where our pump is located. I never wanted to change the point of diversion on the water right of 13-7634 from water Hollow Creek to our water right 13-7632 on the Bear River. I need to have this corrected please. That has never been my intension to transfer the water from Water Hollow Creek to our pump on the Bear River. You and I discuss that option for the future, but not act on it now. Could you please help me with matter.

Thank you

Bob
