Re: Water Right 63-7427E

Dear Pam,

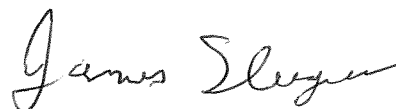

Please release 5.8 acres of the 22.3 acres we submitted to the Idaho Water Supply Bank under water right 63-7427E. These acres will cover current irrigation in the SWSW, S16 that was referenced on our water bank application under Item C5. Transfer No. 78545 was recently approved allowing an irrigation permissible place of use that includes water right 63-7427E and the SWSW, S16 tract. On the water bank application, we estimated we needed to release 4.0 acres to cover unauthorized irrigation in that tract, however GIS analysis indicates we need 5.8 acres for adequate coverage.

Upon release of the requested acres, James and Maria A. Slegers Revocable Living Trust will have a total of 44.5 acres remaining in the Bank; 16.5 acres under water right 63-7427E and 28 acres under water right 63-7753A.

Thank you for your attention to this matter. Please contact Lori Graves with SPF Water Engineering if you have any questions.

Sincerely,

James Slegers

Maria A. Slegers
