Dear Water Right Holders:

The Department has received and processed a Change of Ownership for a portion of your original Water Rights as referenced above. This change of ownership resulted in a split of your original water rights.

When a portion of the original water right has been conveyed to another and the original right has been split, then the original water right number is renumbered by issuing a new water right number to represent each split. Each split contains only the portion of the original right for each separate owner. The above referenced new water right number reflects your remaining portion of the original water right, after the change of ownership. Enclosed is a copy of this new water right for your records. Please refer to your new water right numbers when corresponding with our office.

Updating the ownership record for a water right does not reconfirm the validity of the right. When processing an ownership change notice, the department does not review the history of water use to determine if the right has been forfeited through five years or more of non-use. To read more about water right forfeiture, including how to protect a water right from forfeiture, please see Sections 42-222 and 42-223, Idaho Code.

If you have any questions regarding this matter, please feel free to contact this office at 208-334-2190.

Sincerely,

Rachel Sommer
Administrative Assistant I

<u>Original: Water Right No. 63-4630</u>	<u>Split into: Water Right No. 63-33831 & 63-33832</u>

Dear Water Right Holders:

We have received and processed a Change of Ownership for all or portions of the original Water Rights as referenced above. This Change of Ownership required a split of the majority of the original water rights resulting in renumbering these water rights, using a new water right number to represent each split. The new water right numbers for your portions are referenced above and copies are enclosed.

Updating the ownership record for a water right does not reconfirm the validity of the right. When processing an ownership change notice, the department does not review the history of water use to determine if the right has been forfeited through five years or more of non-use. To read more about water right forfeiture, including how to protect a water right from forfeiture, please see Sections 42-222 and 42-223, Idaho Code.

Your portions of these water rights have a specified point of diversion, nature of use and place of use. If you plan on changing the nature of use, place of use, or point of diversion under these rights, including adding a new point of diversion from the same source, then an Application for Transfer on your portions of these rights is required. You filed two Applications for Transfer forms at the same time the ownership change was filed. Neither transfer is acceptable or necessary. The right you identified in the transfer is not a ground water right like all the rest of the rights you have obtained. Rather, it is a separate right diverted from a separate surface water source known as Indian Creek. The two transfer applications are being returned to you. A refund of the transfer filing fees will be sent to you under separate cover.

Thank you for your patience, as we have had several water right changes to process. If you have any questions concerning the enclosed information or this letter, please feel free to contact this office at 208-334-2190.

Sincerely,

for:

Sharla Curtis
Sr. Water Resource Agent
