RE: Application for Permit No. 63-33771

Dear Mr. Wells:

Enclosed is an amended version of the application for permit you filed with this department recently. The application as originally received is incomplete and processing cannot continue without additional information. The amended version is complete and if you concur with the information as I have prepared it, please initial and date at the bottom of the first page where I have indicated.

Also, for the application to be acceptable it must contain a map showing the point of diversion and place of use. Using county taxlot data, I have prepared a map for your use. I have outlined the place of use for you, however, you need to put an "X" at the spot you propose to drill the well (point of diversion). On the second page of the application under Part 11 I have included a statement that also needs to be completed about the water bearing zone you are seeking with your proposed well.

Please return the amended form to my attention at your earliest convenience. If I do not receive the amended version within 30 days, the original application may be voided for failure to provide additional information as requested. Give me a call if you have questions.

Sincerely,

A handwritten signature in cursive script that reads "Sharla Curtis". The signature is written in dark ink and is positioned above the printed name and title.
