RE: Ground Water Complaint

Scheff ~ Jim ~~S~~heff visited Western today and provided a thorough complaint letter. The letter is quite clear. Additional information he discussed included the following points.

- The domestic well is shared for 2 homes, Scheff and Grausam.
- In past years, NENE irrigation well was used while NESE irrigation well was idle.
- More recently, the opposite has occurred.
- Scheff noted problems with his well when NESE well has been used.
- A pipe from the north-south irrigation mainline roughly bisecting irrigation POU feeds a pond seen in NWNENE. The pond does not appear to have any connection to an irrigation use.
- A runoff collection pond is in SWSWNE, although does not appear any direct conveyance of water from the mainline (additional pipe etc.) is associated with this pond.
- He talked to Hiddleston Drilling and got an estimate of about \$30,000 for a replacement domestic well – probably have to drill to 500-600 ft. per Hiddleston.
- Concerned that replacement well at that depth could be injured by NESE irrigation well that is probably about that deep (most likely is Hickey well, see log; said Hickey passed away last year).
- Local person farms 61-12112 POU but does not know who.
- Asked to be informed of any action IDWR takes in this matter.
