Dear Jonie,

I have tried to mark the areas and explain as best I could. If you have any questions, please call.....852-1088.

I lined in **Red**, my property as it is now. It is 9.17 acres including where my home and Out-buildings are located on Oneida Street. As you can see... the creek that I pump out of (which after 31 years, I have learned is called Thorn Creek) comes into my property at a point about $\frac{3}{4}$ down my West property line and continues around the SW corner and joins with Worm Creek on my property near the SE corner. There is a VERY small spring that I had forgotten about as it produces almost nothing, marked by an X near the SE corner.

The spring that feeds into Thorn Creek is approximately 1-1 1/2 blocks to the north on Blaine Rounds property. I have never actually seen it....only what I have been told.

The original acreage we bought from Dennis Cole includes the property owned by Todd Coburn and the southern portion, marked in **orange**, of Guy Beazer's property. We sold that 4 acres back to Dennis Cole before he sold it to Guy. As you can see, the 6 acres that Dennis retained, marked in black, does not have access to any stream or ditch or creek. Of the 4 properties that are in the original Dennis Cole deed, only mine has access to Thorn Creek. Guy Beazer's property now has access to Worm Creek because we sold that portion back to Dennis before he died.

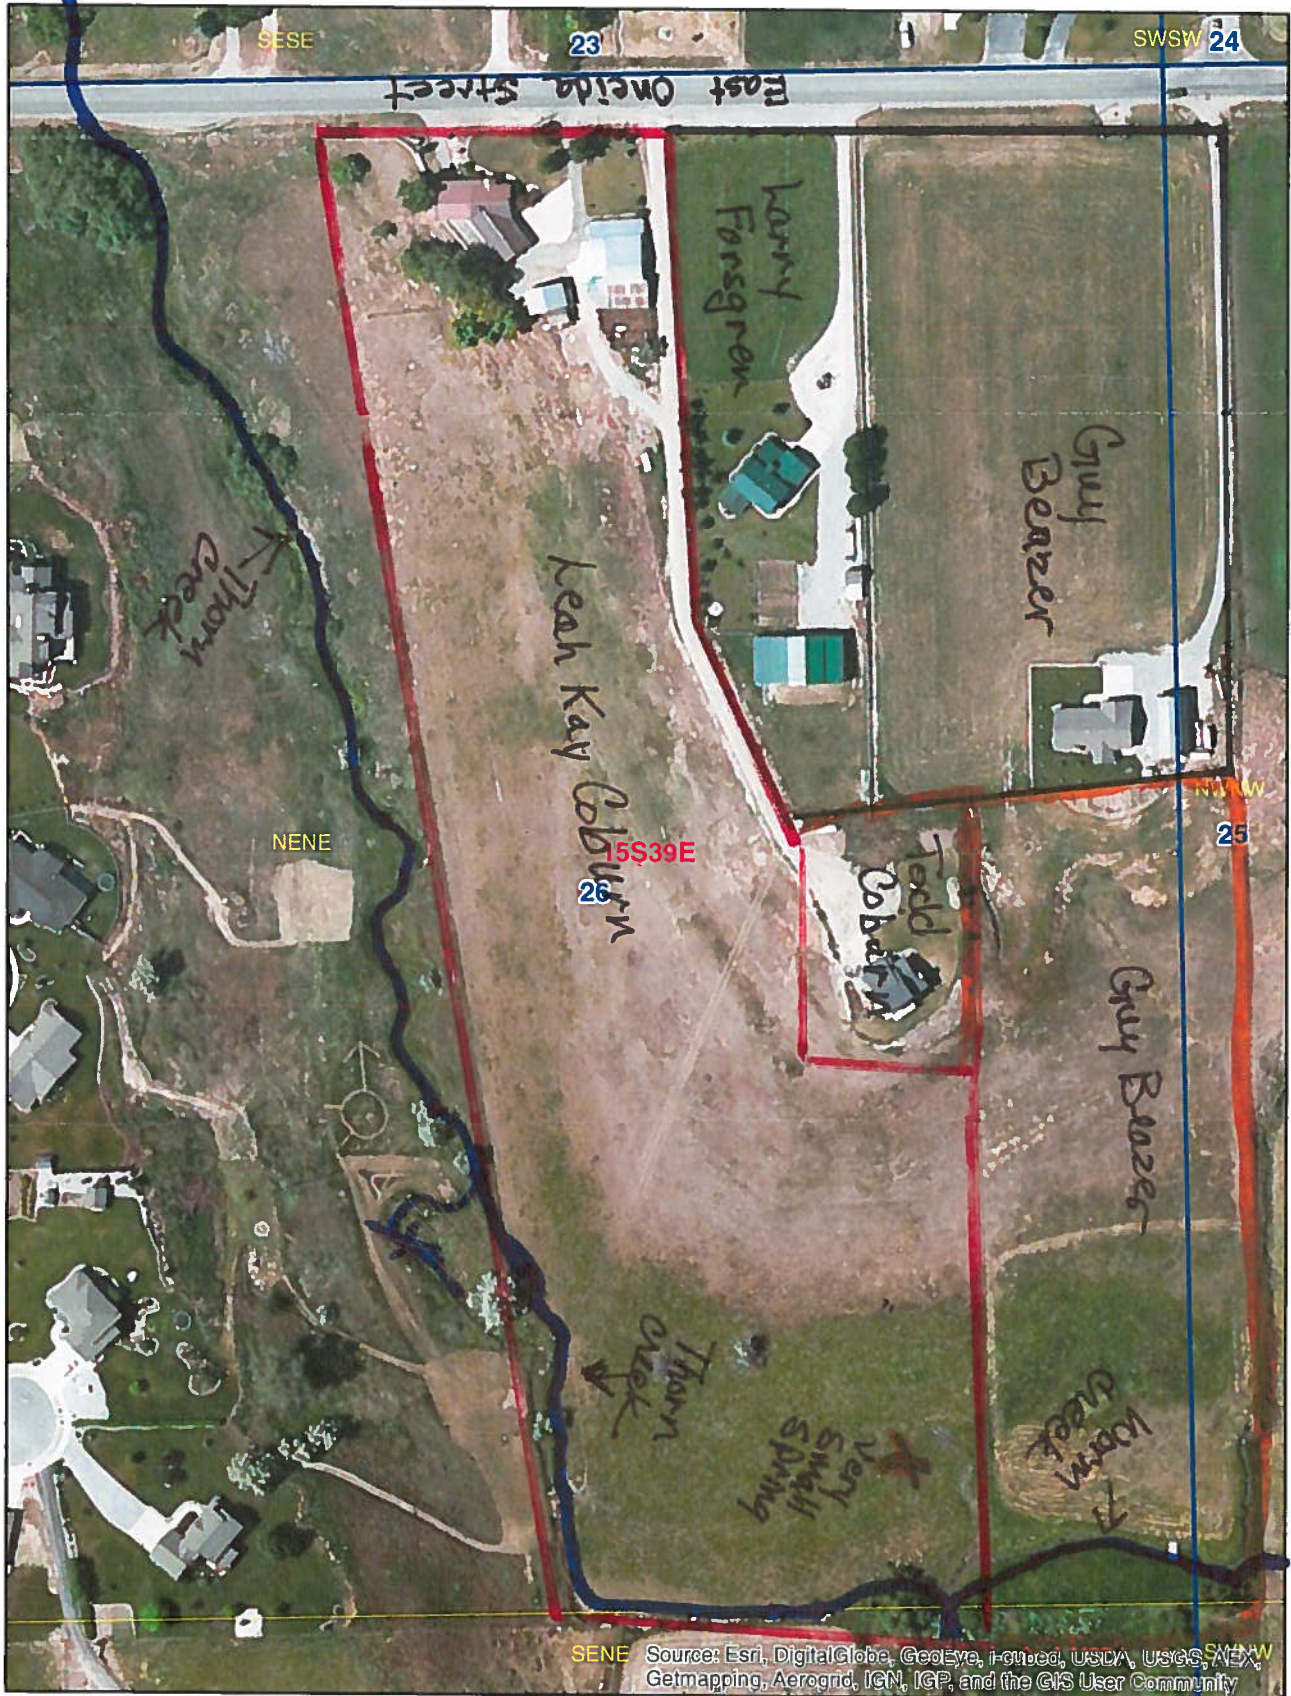

Jonie, I'm sorry if this is confusing. Hopefully, I have cleared up some of your questions. If you have more....Please call.

I hope to be hearing from you soon.

Thank you so much for your help.
