RE: Spring Valley Ground Water Monitoring Data Submittal for the First Half of 2013

Dear Ed:

The Department has reviewed the water level data you submitted via CD on behalf of the City of Eagle in connection with Permit No. 63-32573. The data and reporting method appear to comply with the requirements of the monitoring plan incorporated into the permit as Attachment B. The data has been integrated into the Department's Hydro.Online application for accessing ground water level data, and the CD is stored with the water right file.

The data that you submitted is for water levels taken hourly. The monitoring plan calls for water levels to be measured and recorded at 12-hour intervals (see page 3). To maintain a manageable data set, the Department recommends limiting future data collection and reporting to the 12-hour cycle called for in the plan.

If you have any questions, please call me at 208-287-4947, or email me at [shelley.keen@idwr.idaho.gov](mailto:shelley.keen@idwr.idaho.gov).

Sincerely,

A handwritten signature in black ink that reads "Shelley Keen".
