Thanks Greg. That's one down... Bill's already added it to the file. We may need to have you initial a revised map. I'll see what Allen says.

Please remember that Mr. Smith will also need to get a completed measurement plan to me before we are finished here. I realize he doesn't have a system in place yet but I would imagine he knows what he intends to do with this place - pivot, wheel lines, handlines, solid set, etc, and I think he's probably already talked to someone about the pump size he'll need. Is he going to build a home here or does he farm adjacent acres? Anyway I realize he won't have a diagram or photos. But he will need to work through the measurement plan to the best of his ability at this point, and sign and send it to me and we'll work from there.

I did a compliance check at Baker's place in 7S26E today (2467 / 2668) and there may in fact be a violation regarding some of the acres which were leased to the bank in 2010. Pending another round of digitizing acres, I think I'm still going to find that about 10 of the leased acres were not in fact dried up. Or, it may be that after the lease was approved, acres were increased in other areas. In either case he's over his authorized acres, and this is a violation of some sort. I'm not yet sure of the implications. Because some acres are already rented and the rest already sold, Baker may be forced to dry up additional acres this year to make things even.

I will get back with you as soon as possible. Going to try and get Baker's letter out to him tomorrow.

Bill,

I have changed the Part 2B's for 36-2453A/36-13065A. I talked with Pam Skaggs in Boise and there does not appear to be an identified shape file for the Water Supply Bank for the 8.3 acres that are currently leased to the Bank. Because of this, there is not an inhibiting reason why Cindy Yenter's proposal of drying up an additional 2.2 acres in the NWNW of Section 2 will not work. I have attached the amended Part 2B for 36-2453A and 36-13065A.

Let me know if you need anything else regarding these water rights.
