Subject: Field Exam for Permit 67-07832
Attachments: 67-07832 Lost Track Pond.jpg

Sharla,

Please let me know if the attachment is of sufficient clarity and content to be useful.

The actual storage volume is pretty small as can be seen from the photo. I'm estimating a depression maybe 12 feet in diameter and 18 inches deep that would be no more than 1000 gallons.

In addition I have another similar set of information and photo for 67-07831 that is from an overcast day. The scan of the photo is too grainy so I will mail hard copy to you if the information meets your needs.

Steve

Notes:

not much water!
Small seep maintains this small amount of water, possibly
1,000 gallons, throughout the season.

UTM 11N. 541737E, 4982580N.

Subject: Coordinates - Field Exam for Permit 67-07832

Sharla,

I've been wrestling with lat/long, GPS and UTM coordinates for quite some time. In this recent situation all I had was UTM coordinates. Since then I've located a coordinate converter that I like. If there is a coordinate format that you or the department prefers please let me know and in future business I'll provide coordinates in that format. For 67-07832 the coordinates are:

Degree, Minute, Second:

Latitude: 44° 59'
43.577" N
Longitude: 116° 28'
13.755" W

Degree Decimal:

Latitude:
44.9954380684616
Longitude: -
116.470487464795

Universal Transverse Mercator (UTM):

Zone: 11
Easting: 541737
Northing: 4982580

Minute, Decimal:

Latitude:
44°59.726284107693
6
Longitude: -
116°28.22924788772
3

RE: Water Right Permit No. 67-7832

Dear Permit Holders:

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit:

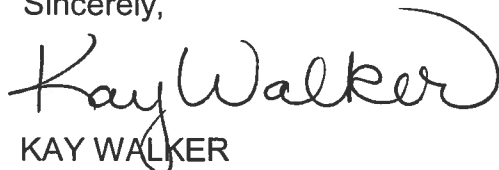

☒ **Point of Diversion**

☒ **Place of Use**

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within 14 days.

If you have any questions, please call me at (208)334-2190.

Sincerely,

KAY WALKER

Sr. Water Resource Agent
