PROOF ACKNOWLEDGEMENT LETTER

RE: Permit No. 63-31683

Dear Permit Holder(s):

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water. Department staff will contact you to schedule the examination.

Well Construction Rules of the Department require additional drilling permit fees in cases where an increased use of water is authorized from wells originally constructed as domestic wells.

According to drilling permit nos. 728753 and 730553 that were provided on your proof statement, I found that both wells identified by these drilling permits were developed for domestic use.

Department records indicate that additional drilling permit fees in the amounts of \$125.00 under drilling permit no.730553, and \$65.00 under drilling permit no.728753 are due based on the non domestic water use developed under your water right permit. **Failure to pay these fees may be cause for cancellation of your water right permit.** Please submit these fees to the Department along with a note of reference identifying the drilling permit number associated with each fee and the water right permit number.

Section 42-248, Idaho Code, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any department office or from the department website at www.idwr.idaho.gov

If you have any questions concerning the field examination, please contact the Western Regional Office of the department in Boise, Idaho (208) 334-2190.

Sincerely,

Darla Block
Technical Records Specialist
