Cherie,
Let's go ahead with it.
Please have Rex let me know when it starts and how much.

Tim

Tim –

Per Liz's email below, it looks like the water right will deliver at 100% through the rental period. Please let us know if this information is adequate to allow you to deliver the water right. Thanks.

All,

I've done some more research into the right. I did find that in 2001 river was cut to the 5/1/1866 right for 4 or 5 days in late August and early September. During that time the right was either fully or partially met. 2001 was the only year in the 2000 -2012 period when the priority fell that low. Perhaps the more pertinent question is whether we expect to see that priority this year. In looking at the current flow conditions, I do not think the priorities will get that low this year. The current natural flow is 300 cfs higher than it was in 2001. The runoff forecast for is also higher than it was in 2001.

Terry,

I apologize for the mistake. Thank you for the correction. That right is not in the 100%/75%/60% splits. If the priority date on the river gets to down to 5/1/1866 as it did in 2001, then the right 63-161 BN may only be partially filled.

Liz,

Your information does not help. The 63-161 water rights (No. 30 in the original Stewart Decree) and the 63-123 rights (No. 2 in the original Stewart Decree) are not cut below 100%. If you check the historical water master records, you can confirm this. As a result, the 63-161 and 63-123 rights do not include the 100%/75%/60% cut language in the SRBA decrees that you find on other Stewart Decree water rights. Please contact Rex Barrie for confirmation.

Cherie,

63-161BN is part of the Stewart Decree. The current priority date on the river is 60% of the Stewart Decree with an 1890 priority. This means that all Stewart Decree rights senior to 1890 will receive 60% of their full allotment. Stewart rights junior to 1890 are not in priority and are off. A rental of 0.5cfs with a 5/1/1866 would receive 60% or 0.3 cfs at the headgate. If Tim takes a loss within the canal, then the actual delivery to the subdivision may be less than 0.3 cfs. A priority date of 5/1/1866 is likely to receive the 60% allotment for the rest of the year but it is not guaranteed. In looking through historical record I found some days in 2001

when 60% of the 5/1/1866 right was only partially filled. I hope this information helps. Let me know if you have any questions.

Hello,

A water supply bank rental application to rent Boise River water using right 63-161BN (SV Homeowners Assn.) was submitted to IDWR last week. The applicant would like to use the water to irrigate subdivision lots located downstream in Meridian. The applicant plans on having the Boise Project deliver the water. Rex, this application is nearly identical to the one I emailed to you a couple weeks ago, which was ultimately denied because the Boise Project would not deliver the water. This application is different because Tim Page was told by SPF, the applicant's representative, that water right 63-161BN would not get cut at all and from what I understand, Tim Page would deliver the water if this was indeed the case. I was hoping I could get something in writing, email is fine, confirming that 63-161BN will or will not be cut.

In addition, if the application does go forward, I would like to use this as an opportunity to solicit watermaster comments from you Rex. Besides the delivery issue, I don't see any obstacles but I attached a copy of their application for your reference. Note that I had returned the application because of the delivery issue but, the applicant plans on re-submitting the application.

Thank you for your time.

Lori,

That is correct, Boise Project will deliver the water through our system. As discussed with you on the phone any water that enters into the Boise Project delivery system will take a 50% loss and there will be a \$16.50 per acre ft. for delivery charge. I hope this is sufficient information.

Subject: Blackrock Subdivision HOA WB Rental Application

Tim,

The Department would like confirmation that Boise Project Board of Control has agreed to deliver water under right 63-161BN to Blackrock Subdivision HOA through the Boise-Kuna Irrigation District (BKID) system. The amount available for rent under water right 63-161BN is 112.5 afa for irrigation use. Although this amount is more than what the HOA will probably need (based on the anticipation that BKID delivery season will end ~Sept. 1), IDWR is requiring the HOA rent all 112.5 afa. Accounting for Boise Project's 50% shrinkage, this allows possible delivery of 56.25 afa to the subdivision, which will be beneficial if the anticipated delivery season for BKID exceeds expectations.

Cherie Palmer, with IDWR, is currently processing the HOA's Water Bank Rental Application for this right. I have copied Cherie this email. Please respond to Cherie, via this email, that Boise Project Board of Control provides their consent to deliver water under right 63-161BN to Blackrock Subdivision HOA. Thanks Tim.

Regards,
Lori

Cherie,

We have approval from Tim Page, Manger of Boise Project Board of Control. His phone number is 344-1141. The HOA need the water ASAP. Can we get the approval today? Tim is ready for delivery.

Hi Lori,

I have been assigned to this application and looked at it yesterday. I sent out correspondence and returned the application as unprocessed. Here is a copy of my letter.

Please let me know if you have questions. Thanks.
