RE: Ownership of 47-7146 and 47-7263B

I spoke to Nick Spencer on the ownership change of these water rights to Catherine Bettis. Ms. Bettis owns the land where the POD of diversion is located for these water rights. Even though the entire place of use is NOT on her land or covered in the deed, she is the owner of the water right as she is the owner of the land that Johnnie Kuest and Bessi Kuest owned when they made a well agreement dated August 25th, 1977, between parties regarding the use of a geo-thermal well for domestic and heating use. I will change the ownership of these rights to Catherine Bettis.

→ and the well is located on her property.
