

MEMORANDUM

Date: June 27, 2013

To: Transfer
78526

From: Blake Jordan

Re: Review & Evaluation of Sufficiency of Information

This transfer proposes to change the point of diversion and place of use for water right 13-7632 and for a portion of water right 13-969A. The applicants seek to combine a two acre portion of water right 13-969A with water right 13-7632 to create a 69.0 acre combined place of use. This transfer will change the point of diversion for the 2 acre portion of water right 13-969A and correct the point of diversion legal description for water right 13-7632. The point of diversion is located in the SESE of 14S, 40E, Section 20.

The transfer application originally included statutory claim water right 13-7634, which has been removed from the application per applicants request.

This transfer also corrects a place of use discrepancy and the total number of acres authorized for irrigation under water right 13-7632 (split from water right 13-969B; see back file and remarks).

Authority to File:

The applicants are the current owners of water rights per IDWR record and owner of proposed place of use per warranty deeds. the ownership for the two acres portion of water right 13-969A will be changed into the applicants name.

Water Right Validity:

Water rights were decreed in 1920. 2009 and 2011 aerial photography shows land to be irrigated. Forfeiture is not an issue.

Injury to Other Water Rights:

Within WD 11. Watermaster was notified about the application no comment was received. This transfer was advertised and was protested. The protests have been resolved.

Enlargement of Use:

No issues identified.

Local Public interest:

No issues identified.

Beneficial Use/Conservation of Water Resources:

No issues identified.

Effect on Economy the Local Area:

No issues identified.

Effect on Agricultural Base of the Local Area:

No issues identified.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
