Re: Improvements - *permit # 67-14859*

A frost free faucet was replaced at the point of the beginning. From here hoses and sprinklers are used by setting manually to water the grass, garden area, strawberry patch, flowers, trees, and shrubs, and irrigate one pasture. A local excavation company was hired to dig a trench to bury the water supply equipment. Electrical wiring was extended in this trench as well. One inch poly pipe and fittings were used to extend the water supply to the barn area. The distance of the extension is approximately 250 feet. At the ending point a frost free faucet was installed. From there hoses and sprinklers are used to manually irrigate one pasture and supply water to livestock.

Thank you,

Judy Huston
