2. Measurements: No field measurement. Operating gauge pressure of 52 psi. Twelve (12) Hunter rotary sprinkler heads per station discharging at 3 gpm/head. Total discharge = 36 gpm (0.08 cfs).

E. FLOW CALCULATIONS Additional Computation Sheets Attached

Measured Method: (Theoretical Horsepower Equation)

$$Q = 8.8 \times 0.7 \times 3/60 + (2.31 \times 52) = 18.48/180.12 = 0.10 \text{ cfs}$$

$$Q(\text{sprinklers}) = 12 \text{ heads} \times 3 \text{ gpm} = 36 \text{ gpm} (0.08 \text{ cfs})$$

$$Q(\text{theoretical}) = 0.10 \text{ cfs} > 0.08 \text{ cfs } Q(\text{sprinklers}) > 0.05 \text{ cfs } Q(\text{permit})$$

$$Z = 60'$$

$$HP = 3$$

$$P = 52 \text{ psi (gauge)}$$

Based on the calculations and the manufacturer's sprinkler discharge data, appears that the current pumping system is capable of attaining the permit diversion rate of 0.05 cfs. Recommend the permit diversion rate of 0.05 cfs.

F. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 1.6 \times 4.5 = 7.2 \text{ AFA}$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation season}) \times 1.9835 = 0.05 \times 260 \times 1.9835 = 25.8 \text{ AFA}$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 7.2 \text{ AFA}$$

2. Volume Calculations for Other Uses: N/A

G. NARRATIVE/REMARKS/COMMENTS**WATER SUPPLY SYSTEM:**

A 3-hp submersible pump diverts water from a ground water well for irrigation of 1.6 acres of pasture. The ground water well was drilled in 1966, but a well log could not be located. In June, 2001, SOS Well Drilling and Pump Company performed a flow test with a 2-hp pump. During the flow test, it was determined that the well is 120' deep, and has a static water level of 21'. The pump is set at a depth of 60'. The right holder replaced the 2-hp pump with a 3-hp pump in 2011.

IRRIGATION SYSTEM:

The entire pasture land, which comprises approximately 5.1 acres, is irrigated by a total of ten (10) stations. The 1.6 acres of pasture irrigated from this water right permit is comprised of three (3) stations. Each station is comprised of twelve (12) Hunter pop-up rotary sprinklers. Each sprinkler is protected by a concrete ring set flush with the ground.

OVERLAP ANALYSIS:

Point of Diversion: Water Right Permit No. 63-33175, Water Right Permit No. 63-33319, and Water Rights 63-11156 and 63-26751, use the same point of diversion.

Place of Use: The irrigation place of use for Water Right Permit No. 63-33175 and Water Right 63-11156 overlap.

Have conditions of permit approval been met? ☒ Yes ☐ No

Re: Flow Test at 12349 Galloway Rd.

Pump was run for over an hour at 25 gallons per minute. Water flowed steady and clear, at 50 PSI, with a draw down of 15ft. Static water level is 21ft. Well depth 120ft. Pump level 60ft.
System is in good working order.

Respectfully,

Tony Hackett

RE: License Review of Exams

Date: June 25, 2013

.....

In review of the field examinations of Permits 63-33175 and 63-33319 I had questions concerning the use of water under 63-11156. I searched our records under 63-33175 to find out why we only allowed 1.6 acres of irrigation within their 3.5 acre place of use. When the application was filed for 63-33175 the applicant had no knowledge of Rt. 63-11156. Since Rt. 63-11156 had 1.9 acres of irrigation decreed, IDWR only allowed an additional 1.6 acres under 63-33175 to bring the total up to 3.5 acres of irrigation. When Rick Collingwood conducted the examinations he found a total of 5.1 acres being irrigated. He thought that 63-11156 and 63-33175 covered the same 1.9 acres and recommended 3.5 under 63-33319. The irrigation is proposed to be covered as follows:

63-11156	1.9 acres	0.06 cfs (0.0316 cfs/ac)	8.6 acre feet (4.53 af/ac)
63-33175	1.6 acres	0.05 cfs (0.0313 cfs/ac)	7.2 acre feet (4.5 af/ac)
63-33319	1.6 acres	0.05 cfs (0.0313 cfs/ac)	7.2 acre feet (4.5 af/ac)
	5.1 acres		

I discussed this with Rick and he was agreeable to the changes proposed to his field exam recommendations.

RE: Scheduling Field Exam for Water Right Permit No. 63-33175

We are planning to **conduct water right field examinations** in the vicinity of the above-referenced permit **during the week of April 22, 2013**. An examination is needed to verify your water use in order to issue a water right license.

Please be advised that you will need to operate your system under normal operating conditions during the examination. The permit authorizes the diversion of 0.05 cfs of ground water for irrigation of 1.6 acres.

In order to conduct your exam as efficiently as possible, we ask that you call this office to schedule a day and time convenient for you. **Please call me at 208-334-2190 by April 19, 2013, to conduct the exam during the week of April 22, 2013.** If there is a problem with scheduling or conducting the examination at this time, please let me know so we can reschedule or make other arrangements.

I appreciate your attention to this matter and I look forward to hearing from you.

Sincerely,

Rick Collingwood, P.E.
Water Resource Agent, Sr.
