

MEMORANDUM

DATE: July 1, 2013
TO: Permit File No. 22-13826
FROM: Darla Block
RE: Review of Extension Received & Phone Conversation

On April 29, 2013, the department received a request for extension of time form and fee for permit no. 22-13826. I wanted to find out the meaning of what was written under the part of the form that asks why the permit holder was unable to complete the remainder of the work. The permit holder wrote the following answer: "Discrepancy between irrigation and industrial." The permit holder also wrote that the well was drilled and production had started.

On June 14, 2013, I spoke with Mr. Walters a representative of D & C Properties, LLC. After speaking with the permit holder it was my understanding that the permit holder was directed by the Eastern Regional office of the Department to file the extension request. Upon further conversation it was my understanding that the permit holder was done with the development and using the water to the full diversion rate of 0.78 cfs listed on the permit for industrial use.

On June 14, 2013, I sent the permit holder an email with an attached Statement of Completion form, and instructed the permit holder on filing proof with the additional \$50.00 needed to cover the license examination fee.

As of the date of this memo the department had not received a statement of completion form, additional fee, or any response to a previous email. Today I decided to process the request for extension of time form that was timely filed.
