G. NARRATIVE/REMARKS/COMMENTS

Application for permit 47-16825 was filed on November 28, 2001 for the diversion of up to 0.04 cfs of groundwater for domestic use associated with a home. Permit 47-16825 was issued on July 3, 2002. Note that the permit includes a condition indicating heating is part of the domestic use, and total use shall not exceed 13,000 gallons per day. Proof of Beneficial use was filed on June 17, 2003.

The current owner of permit 47-16825 passed away November 17, 2006; his spouse Ruth L Story has since remarried and is now know as Ruth L Clark. Mrs. Clark has submitted a Quitclaim Deed to show ownership of the property and a copy of George Story's death certificate.

On September 18th, 2012 Corey Skinner and I met with Ruth and Roger Clark at their residence and conducted the licensing field exam. The Clark's explained that the well is used for culinary use for the home and to heat a portion of their residence and garage. A 1" buried line from the geothermal well supplies water for the home and garage. The well is a shared well located on Evelyn and Frank Poppay's property. Evelyn Poppay is Ruth Clark's sister and Evelyn and Frank Poppay sold this property to Ruth (Ruth Clark). A Notice of Change in Water Right Ownership has been submitted to place water right 47-16825 and a portion of irrigation right 47-7115 D into Ruth L Clark's name. Irrigation for the property will be covered by the ownership change and split of 47-7115 D. In addition an Application for Amendment has been submitted to correct the legal description of the point of diversion.

A physical measurement is not required for domestic use if the diversion rate does not exceed 0.24 cfs according to the new Beneficial Use Examination Rules. **Recommend permitted rate of 0.04 cfs**
