

MEMORANDUM

Date: June 20, 2013
To: Water Right File 63-32713
From: Steve Lester 
Re: **Condition #165 Modified**

This condition was inadvertently included in approved transfer 78258 due to unknown water bearing zone of community irrigation well for Echanove Subdivision early in processing the transfer. Condition added in draft approval stage regarding use of separate well for applicant.

Later was confirmed community well included shallow ground water less than 200 ft. deep upstream from Star, so transfer did not need this condition. This was missed in final approval. All of this happened during implementation of new Workflow transfer system where reviewing draft approvals was problematic.

Error could be corrected if any future action on this right. Other transfers to do the same thing could be approved without this condition.
