RECOMMENDATION OF WATERMASTER

Application No: Temporary change
Water Right No: 37-8705, 37-7149, 37-7394
Applicant Name: Shaw

Watermaster's Recommendation:

- a) ☐ I do not oppose approval of this application
b) ☒ I do not oppose approval of this application under the following terms:

37-7394 and 37-7814 are limited to a combined diversion rate of 5.94 cfs

- c) ☐ I oppose approval of this application(s) for the following reasons:
d) ☒ Additional comment:

There are about 900 shares of BWCC (Magic Res) water on this farm (total around 1500 acres) which will be turned off at the end of June. The system of three wells and relift pumps has been tied together for some time to maximize distribution of the surface water. Most of the ground water is primary source, but 37-8705 is supplemental. A permanent transfer has been filed to create a PPU for the available ground water (1159 acres) but will not be approved before the end of the irrigation season. For this year, a temp transfer is still necessary to get the ground water to the needed acres. All wells presently open-discharge and are measured with hour meters.
