

MEMORANDUM

Date: June 18, 2013

To: Transfer
78645

From: Kade Raymond

Re: Review & Evaluation of Sufficiency of Information

Transfer 78645 proposes to change the place of use for water rights 31-160B, 31-161B, 31-2299, 31-2415, 31-4011C, 31-7131, and 31-7320. In October 2012 the applicants filed transfer 78265, which was approved on March 19, 2013. After installing a pivot the applicants determined that the place of use actually irrigated by the new pivot was different than the place of use designated in the transfer. The applicant is filing this transfer to make sure all of the ground being irrigated by the new pivot is covered by the place of use of the above water rights.

There will be no change to points of diversion for the above water rights.

Authority to File:

The applicant is the current owner of all of the above mentioned water rights per IDWR record. Warranty deeds were provided with transfer 78265 and were not required with this application.

Water Right Validity:

All rights were decreed in 2003. Based on 2009 and 2011 aerial photography 1104 acres have consistently been irrigated, therefore forfeiture is not an issue.

Injury to Other Water Rights:

The POU for the proposed transfer is located within water district 110. There are not any point of diversion changes proposed in this transfer. The watermaster does not oppose this transfer. Will process as a no advertising transfer. No injury issues identified.

Enlargement of Use:

No issues identified.

Local Public Interest:

No issues identified.

Beneficial Use/Conservation of Water Resources:

No issues identified.
