***Subject: Application for Transfer***

Dear Steve,

Enclosed on behalf of The James and Maria A. Slegers Revocable Living Trust is an *Application for Transfer* proposing the following changes:

- 1) Integrated irrigation system. The water rights proposed for transfer authorize irrigation of 328.3 total acres, of which 278 are currently being irrigated. The remaining 50.3 acres are being submitted to the Idaho Water Supply Bank for lease (copies attached). A permissible place of use (ppu) is being proposed for irrigation flexibility and will allow the applicant to release banked water to cover four additional acres west of the dairy in the SWSW, Section 16, currently being irrigated without water right coverage, and pivot corners if desired.

The wells listed in the SWNE, S15 and the SENE, S16 on water rights 63-7427E and 63-7753A are not owned or used by the applicant and therefore, not proposed as part of the integrated system. Also, an existing well listed in the NWSW on water rights 63-7427D and 63-7427F, is actually located in the SWSW as proposed.

- 2) Commercial/stockwater place of use. The current dairy operation encompasses the S1/2SW, S16. The authorized place of use for commercial/ stockwater right 63-7427D is the SWSW. The authorized place of use for associated stockwater right 63-7427F is the SESW. As proposed, both rights will describe the S1/2SW.
- 3) Water right ownership. Ownership documentation provided in Attachment 3 will allow the water rights to be changed into the name of the Trust.
- 4) Removal of an incorrect remark listed on water right 63-7427E that states "Use of water under this right is combined with water diverted in the State of Wyoming". This correction is self-explanatory.
