- ☒ If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. Label it **Attachment #7b**. If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

B. CHANGES IN NATURE OF USE (Water Balance)

- ☐ If you propose to change the nature of use or period of use of all or part of the rights(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Also attach documentation showing that the portion of the right(s) to be changed will not be enlarged in rate, volume, or consumptive use through the proposed change. Label it **Attachment #8a**.

C. PLACE OF USE CHANGES TO SUPPLEMENTAL IRRIGATION RIGHTS

- ☐ If you propose to change the place of use of a supplemental irrigation right, answer below and attach supporting documentation. Label it **Attachment #8b**.

1. Describe how the supplemental water rights have been used historically in conjunction with other water rights at the existing place of use. Describe the time during the irrigation season that the supplemental rights have been used. Include information about the availability or reliability of the primary right(s) being supplemented, both before and after the change. If the applicant is proposing to change a supplemental irrigation right to a primary right, provide the information required on Part 3B above.: _____

Carry out one way analysis. If reach depletions go up, it is a debit, if they go down, it is a credit. Sum all debits, only where mitigation is required (dark yellow), and all credits (light yellow). Mitigation is required for the full amount of the summed values if greater than zero.

Steady state analysis represents permanent mitigation requirements at future steady state (or last timestep from the ESPAM Transfer Tool model run).

Transient state analysis represents mitigation requirements for the worst or maximum time step in the model run.

Evaluation of transient state mitigation requirement is not comprehensive across all time steps. Instead this evaluation finds the maximum stream depletion following the start of the transfer and looks at depletion amounts from that time step. In many instances this depletion is greater than the depletion associated with the steady state condition or final time step. This evaluation is merely an indicator of whether transient depletions must be considered, not an indicator of all transient impacts.

Evaluation of Permanent Mitigation Efforts from use, acreage consolidations, in Addition to Off-Setting Transfer Benefits: Steady State Evaluation Only

The purpose of the transfer is to change a portion of the above rights as follows: Application proposes modifying a portion of six irrigation wastewater rights that currently authorize the diversion of 7.90 cfs for the irrigation of 395 acres on a farm located approximately 9.3 -10.6 miles east and 4.9 – 5.9 miles south of the center of Jerome. A 72 acre portion of the wastewater rights will be converted to provide 187.6 acre feet of water annually to cover water storage and evaporative losses associated with a reservoir on the farm. The remaining portion of the rights, 6.46 cfs, will be used to irrigate 323 acres within a proposed 485 acre permissible place of use on the farm. The application also proposes to change the authorized point of diversion locations to reflect the actual current diversion locations on the farm.

MEMORANDUM

Date: May 29, 2013
To: Transfer 78555 File
From: Benny Walker
Re: Evaluation of Sufficiency of Information Submitted

Transfer proposes to move a 3.7 acre portion (0.07 cfs) of two ground water rights from a farm located approximately 3.3-3.7 miles north and 3.6-4.0 miles east of the City of Rupert and a 21.0 acre portion (0.29 cfs) of a ground water right from a farm located approximately 16.0-18.0 miles north and 5.0-6.0 miles east of the City of Rupert, to the proposed new place of use located approximately 13.5-15.0 miles north and 16.5-18.5 miles west of the City of Rupert. The transferred portion of the ground water rights will be diverted from two existing wells located at the proposed new place of use. Note that the transfer proposes to place the transferred rights into an existing common permissible place of use with several rights. A ground water model analysis was submitted showing the potential impact is within department guidelines. The properties and points of diversions are within water district 130 and water master comments will be sought. The three water rights proposed to be transferred (36-16550, 36-16556, and 36-16924) are currently leased to the Water Supply Bank. Water rights 36-16550 and 36-16556 are currently not rented from the bank. Water right 36-16924 is currently rented for use on the proposed place of use. The transfer applicant proposes to remove the portions of the three water rights (36-16550, 36-16556, and 36-16924) involved with the transfer from the Water Supply Bank to use on the proposed place of use.

- **Authority to File:**
The applicant has submitted a quitclaim deed from the water right owners to the applicant for the portions of the water rights involved with the transfer. A warranty deed was provided by the applicant showing ownership of the proposed place of use. A letter was submitted from the Lien Holder, Northwest Farm Credit, giving consent for the transfer. A Limited Power of Attorney was submitted allowing Brockway Engineering to act on behalf of the applicant, signed by the partners of Jentzsch Kearl farms as listed with the Secretary of the State of Idaho.
- **Water Right Validity:**
Water Rights 36-16550 and 36-16924 were decreed in 2001. Water Right 36-16556 was decreed in 2002. Review of recent aerial photography indicates that the rights appear to have been used in recent years. All the rights are currently in the Water Supply Bank
- **Injury to Other Water Rights:**
None anticipated. A ground water model analysis was submitted with the application and the impacts are within the 2 acre-feet per trimester allowed under the transfer processing memo No.24.
- **Enlargement of Use:**
None anticipated. The transfer will result in a reduction of acres and cfs of the water rights on the original place of use, and limit the proposed new place of use to the additional acres and cfs.
- **Local Public Interest:**
Potential hydrological impact is within department guidelines. Application will be subject to public notice and protest.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water
- **Effect on Economy of the Local Area:**
No issues anticipated
- **Effect of the Agricultural Base of the Local Area:**
None anticipated.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application

Re: Jentzsch-Kearl Farms

Dear Mr. Walker:

I received your letter dated April 4, 2013 that indicated that you had several concerns or issues that needed to be resolved before the proposed transfer could be processed. This letter will address your issues and should allow the transfer to move forward.

A quit claim deed for 21.0 acres of 36-16924 from Melynda Kearl, Joseph Kearl, Shirley S Jentzsch and Rodney Jentzsch to Jentzsch-Kearl Farms has been signed and notarized.

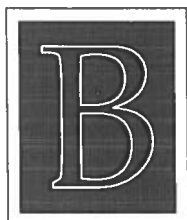

A quit claim deed for 1.8 acres of 36-16556 and 1.9 acres of 36-16550 from Shirley S Jentzsch and Rodney Jentzsch to Jentzsch-Kearl Farms has been signed and notarized.

You can find a copy of the warranty deed for this farm in the Idaho Department of Water Resources back file under water rights 36-16416, 36-16418, 36-16420, 36-16422 and 36-16424. Recent ownership change supporting documents included the current warranty deed.

A limited power of attorney document for Melynda Kearl, Joseph Kearl, Shirley S Jentzsch, Rodney Jentzsch and Jentzsch-Kearl Farms is being provided that shows that Zach Latham of Brockway Engineering is authorized to sign the transfer application on their behalf.

Amended maps are also being provided to show the two PODs on the farm, the correct acre amounts for the POU and the correct water right number on the supporting aerial map. A spreadsheet of the acres per quarter quarter of the POU are also being provided to help aid IDWR in processing this transfer.

No amendments have been made to the transfer to change the proposed ownership, POD locations, PPU shape, diversion rates, volume amounts,

period of use, beneficial use, ESPA Modeling or water rights involved in the transfer. Therefore, a new signature from Zach Latham is not required and the transfer should be able to be processed by IDWR without a new signature.

The mortgage holder for the farm would like to include a transfer number in their consent letter. So please forward to me the transfer number of this transfer when IDWR has assigned one.

Greg Sullivan, M.S.

Re: Jentzsch-Kearl Farms

Dear Mr. Merritt:

Jentzsch-Kearl Farms purchased a farm in Lincoln County in December of 2012 from Ardel Wickel. At the time of the purchase, a rental was approved to provide an additional 55.6 acres of water to the farm. This transfer proposes to provide 24.7 acres of water to this farm. When approved, this transfer would allow 30.9 acres of water to be rented from the Idaho Water Supply Bank.

It is proposed that 21.0 acres from 36-16924, 1.9 acres from 36-16550 and 1.8 acres from 36-16556. The place of use and the points of diversion will be changing.

ESPA model analysis utilized the From Cells of 71072 and 82084 and the To Cell 62052. The ESPA model analysis indicated that no mitigation is required due to this transfer.

A consent letter will be signed by North West Farm Credit after the a transfer number has been assigned to the transfer application.

Please copy our office on all correspondence regarding this application.

Sincerely,

Greg Sullivan, M.S.

Re: Jentzsch-Kearl Farms

RECEIVED
APR 11 2013
DEPT. OF WATER RESOURCES
SOUTHERN REGION

Dear Mr. Sullivan

You recently filed an application for transfer in the name of Jentzsch-Kearl Farms involving a proposed change in the point of diversion and place of use for a number of water rights. However, review of the transfer application revealed issues and/or incomplete items that make them unacceptable for processing. As a result, we are returning the transfer applications and the filing fees of \$500.00 (Brockway Engineering check # 11347).

There is no information included with the transfer application that indicates that the applicant Jentzsch-Kearl Farms owns the rights to be transferred, or has any authority to make changes to the rights. According to our records, Jentzsch-Kearl Farms is not listed as the current owners of water rights 36-16924, 36-16550, and 36-16556. The applicant's name must match the department's current record of ownership for the water rights (or parts thereof) being transferred. If the applicant's name does not match the name in the department's records for the current owner of the rights sought to be transferred, the applicant must provide evidence of current ownership or authority to make the proposed changes. In addition the documentation must clearly address the issue of whether the applicant will retain ownership of the rights, or whether the water right owners will own the rights on someone else's land once the transfer is approved.

If there is to be an ownership change for the portion of water rights 36-16924, 36-16550, and 36-16556 proposed to be transferred additional fees are required and supporting documentation must be included.

Page 2 Jentzsch- Kearl Farms Transfer
Greg Sullivan
Brockway Engineering

The Agreement for Sale of Real and Personal Property for the proposed permissible place of use is not considered sufficient evidence of ownership of the property because it does not confirm that the property has been conveyed. According to this sales agreement "The sale will be closed at Land Title & Escrow, Inc at Burley, Idaho, not later than December 20, 2012" if this transaction was completed then a warranty deed should have been issued and provided with the transfer.

If the application for transfer is in the name of a corporation, partnership, joint venture, association, or other business entity, department staff must verify the organization is a viable and legally recognizable entity. I conducted a Business Entity Search via the Idaho Secretary of State's website. This search did not appear to indicate Bryan Jentzsch as a representative of, nor has the authority to sign on behalf of, Jentzsch-Kearl Farms. The intent of this search is to insure that the organization is properly identified, including identification of individuals with signature authority and responsibility to conduct the organizations activity. This raises questions regarding the validity of the Limited Power of Attorney document that was included with the application.

The maps showing the proposed new place of use identify three points of diversion, but the application only identifies two points of diversion. If a third point of diversion is proposed, then it should be listed on the application and additional filing fees are needed.

The map submitted with the application showing the number of acres of the POU does not add up to the 771.7 acre total indicated on the map, or the total authorized acres involved in the transfer.

The map submitted showing the acres from the Acequia Farm list water right 36-15661E as one of the rights having acres being dried up. The department has no record of this right.

If you have any questions, or need any further assistance, feel free to contact this office at your convenience.

Sincerely,

Benny Walker
