As per discussion on Phone 4/15/2013

I have tub in place - no water diversion working at this time water is to high. I will only be using this for cooling. Redid shed & will be adding a lean too on to it same - water will be pumped up into (tub / will be replacing w trough.) then overflow has pipe on it right back in to creek. Domestic use bucket it to house for use in flushing toilet as they have been working on water pipes in the town. As the use will eventually be a water wheel (sm one) in creek summer only.

Main reason to get water permit was cooling (building a spring house)

Any questions please call

Thank You Denise McKinney
208-245-0186

We have only been using the ^{Surface} water
So far only to flush toilets when
they are working on town water
System & when electrical is out.
(power)

I have some container plants that
I also water + plants in the
Back by the point of diversion
(tub)

We will be building a lean to
to go over tub @ a later point.

I do not use when water is low
I figure the fish need all they can
get.

Thank You

Denise McKerney
