Blake,

Attached are the two documents you requested to support administrative action by the Department on the POD Transfer Application for 11-377 through 11-380.

Apologize for the delay in getting these too you.

Ernie

RE: Permissible Place of Use for 11-377 through 11-380

Dear Blake:

Bear River Meadows LLC seeks approval of transfer application 78477 correcting the legal description for the decreed point of diversion and requests that the 40 acre tracts originally decreed as the place of use continue to be honored as a description for place of use in the form of a permissible place of use (PPU). The boundary for the PPU should follow the outline of the 40 acre tracts described as the place of use for water rights 11-377 through 11-380 except for the following: in the NW Section 33 the PPU is south and west of the unnamed stream tributary to the Bear River, in Sections 28 and 29 it is south of the Bear River, and it is minus the parcel identified as an exception, on Exhibit A, Tract II, Section 32 of the Quit Claim, recorded in Caribou County as Instrument #181446. The boundary for the PPU is outlined in yellow on the attached document titled "PPU and Irrigated Acres Boundary for 11-377 through 11-380." Since a condition of the decree limits irrigation under these water rights to a combined total of 240 acres, the boundary for the irrigated acres is outlined in red on the same attachment. Realizing the location of the irrigated acres within the PPU may change, Bear River Meadows requests the opportunity to notify IDWR when such a change occurs by providing an updated shape file in lieu of having to file another transfer application.

Respectfully
