Subject: RE: Water Rights Change of Ownership with split 96-7833
Attachments: DOC.pdf

The Clarks filed a change of ownership on this water right in July 2007, I got it from a backlog of changes late last year. I contacted Tom Clark last week to clarify the original right for 9 acres would require a split and clarify which property had the greenhouse. I have enclosed the conversation memo, a the original water right printout and a map showing the tax lot information for you to review. Basically I just need to know how many acres each of you are irrigating and then can split the water accordingly. The water right license indicates domestic use from springs, so can split this to allow each of you domestic use. In your case, the well replaced the spring for domestic use and gives you the priority date of 10/18/1979. You will need to also submit an ownership change after I split the Clark property and put the 96-7833 in your name.

Just need something from both of you as to how to split the irrigation by acreage, unless you are not and will not be irrigating on your parcel. If you have questions you can call me at 208-287-4910. I will be gone after 2:00 today but will be here by 7:30 am in the morning. I can take verbal responses from both of you or an email with both of your email addresses then proceed to get both of you your share of the original water right.

Subject: Water Rights

Hi there,
My name is Brian Grosenbaugh and I live at 533 Denton Road in Hope, ID. My neighbor Tom called the other day and said that you had some questions about our water rights. Please let me know how I can help.
Thanks...Brian
