RE: Water Right Permit No. 57-7727

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, there are points of diversion that appear to be on a canal that are actually on Bennett Creek. Therefore, those points of diversion need to be described as points of re-diversion. Please review the attached map for the new points of re-diversion.

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within 14 days.

You also only paid \$50 when you submitted the proof of beneficial form for this permit. The cost of proof of proof of beneficial use for a water right of this size is actually \$200. An additional \$150 is required to bring this current plus a late fee of \$30 for not paying the proper amount at the time required. Therefore, please submit \$180 to bring your proof of beneficial use form current. **With the amendment fee, the total amount required to license this permit is \$280.**

If you have any questions, please contact me.

Sincerely,
Daniel A. Nelson
