Blake:

Regarding the consent on the Smith property (80 acres) located at the NWNE and SWNE of Section 2, Township 4N, Range 40E, the prior consent submitted by the Smiths on the transfer last year does not limit their consent to only last year's transfer. It provides that they consent to moving water rights onto their 80 acres, without a limit on acreage. We think this consent is broad enough to cover what is proposed in the current transfer. To be clear, the condition that we remove the water rights in 5 years remains in place even with this proposed current transfer.

Thanks for your attention to this.

Not to be a stickler but the shapefile would have to be attached to the application.

Create a map and send it.

Blake:

Here is the current 778 acre POU. I'll send more shapefiles in separate emails.

Subject: Sutton Water Right Transfer Map

Hi Rob,

For this transfer can you provide a map that delineates the current place of use for water rights 22-2242B and 22-10897? In our meeting I told you not to worry about it but as I read the Minimum Requirement Checklist, item #7B asks the applicant to attach a shape file, aerial photo or other image.....

Thanks,
Blake

SUTTON WATER RIGHT TRANSFER
