5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future

Water diverted from Deep Creek through canal heading located at the Curlew Valley Dam which splits into
east and west lateral ditches. Measuring devices already in place. Additional points of diversion in
Utah. Much of canal company shares are associated with irrigated acres in Utah. Service boundary only
reflects irrigated acres within Idaho.

- b. Who owns the property at the point(s) of diversion

If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:

- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?
No, ☒ If Yes, ☐

Attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed
changes on official letterhead signed by an authorized representative. Label it Attachment #6. List the name of the entity and
type of lien: N/A

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes
that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on
this application may result in rejection of the application or cancellation of an approval.

- d. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:

Transfer only changes service boundary. No new acres will be irrigated.

- e. Describe the use of any other water right(s) for the same purpose or land, or same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:

There are a few private ground water rights which are used within the Curlew Irrigation Company serv
ice boundary.

- f. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

APPLICATION FOR TRANSFER OF WATER RIGHT

PART 3

☒ Attach a map of the diversion, measurement, control, and distribution system. Label it **Attachment #7a**.

☒ If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. Label it **Attachment #7b**. If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

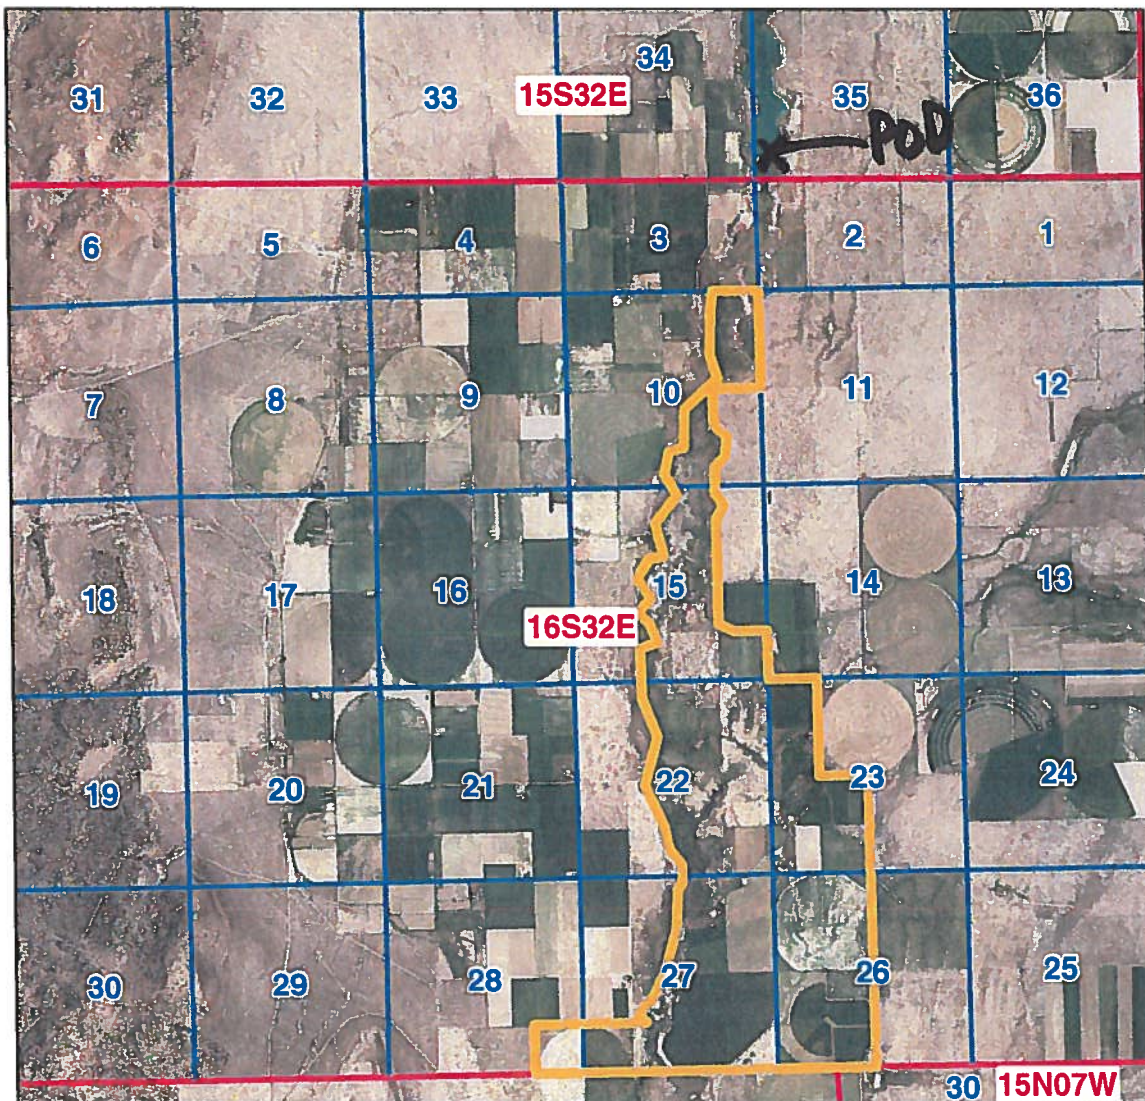

☐ If you propose to change the nature of use or period of use of all or part of the right(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Also attach documentation showing that the portion of the right(s) to be changed will not be enlarged in rate, volume, or consumptive use through the proposed change. Label it **Attachment #8a**.

☐ If you propose to change the place of use of a supplemental irrigation right, answer below and attach supporting documentation. Label it **Attachment #8b**

1. Describe how the supplemental water rights have been used historically in conjunction with other water rights at the existing place of use. Describe the time during the irrigation season that the supplemental rights have been used. Include information about the availability or reliability of the primary right(s) being supplemented, both before and after the change. If the applicant is proposing to change a supplemental irrigation right to a primary right, provide the information required on Part 3B above.:

Whereas per a December 15th 1914 degree Curlew Irrigation and Reservoir Company is the owner of and entitled to the use of all the natural flow of Curlew(Deep) Creek to be distributed at its head gates into the laterals of its canal system as follows: 339 miner's inches in its sinks lateral plus 78 miner's inches for water loss as determined in the August 9, 1940 lawsuit from March 1st to September 30th, 747 miner's inches in its east lateral, and 312 miner's inches in its west lateral during the irrigation season beginning April 20th and ending September 20th and continuing in the sinks lateral, each and every year, and during the remainder of the year Curlew Irrigation and Reservoir Company is the owner of and entitled to the use of the flow of said stream through its east and west lateral sufficient to supply the needs of its stockholders for household, culinary and stock purposes down to a point one-half mile south of the Utah-Idaho State Line. Also 115 miner's inches in the North Lateral. And beings Delmore Canal Company is the owner of a dam and reservoir situate on said Deep or Curlew Creek above all the above named laterals, except the north lateral, for the storage of the unappropriated waters flowing in said stream and of the right to impound and use said waters except that owned and used by the Curlew Irrigation and Reservoir Company during the times aforesaid. That since the construction of said reservoir the natural flow of said stream is impounded in said reservoir which prevents the free flow of said stream down the natural channel thereof to the head gates and laterals of the Curlew Irrigation and Reservoir Company, Delmore Canal Company shall be required to deliver through the head gate of its said reservoir only such quantity of water as will make up any deficiency to supply the quantities to the Curlew and Reservoir Company that it is entitled at its said head gates. To accomplish this a water master must be selected whose wages will be paid equally by both Delmore and Curlew Irrigation and Reservoir Company to deliver said quantity of water through the various head gates as will carry out the delivery of the waters in the correct and proper manner to the designated laterals.

The reservoir and delivery canal is on Forest Service ground and continues south from the reservoir until it reaches Lyle Steeds fence and then the canals are on his ground with only a right of way through his property.

Approximately 583 acres are being irrigated in Utah out of the East lateral. Approximately 590 acres are irrigated in Utah by means of the West lateral. And approximately 800 acres are being irrigated at the Rose of Snowville Ranch via the Deep Creek or Sinks lateral.

 Green Hansen moved we start meeting
 Green asked about Russian Olives North
 of Alan Terry's. Rod mentioned he
 did spray those tree's ~~at~~ Nov. 9 with
 2:4-D. Hopefully time will show they
 are killed. Rod said he also done
 a lot of spraying in Ronnie Anderson's
 same problem with Canadian and Bull thistle
 in Ronnie's.

Roy mentioned that the weed sprayed for
 Oneida County had a good recipe for thistle

Rod Arlon moved we approve ~~meeting~~ minutes
 for last year. Green 2nd.

Roy read financial report for both East
 and West canals.

Total Expense for East over \$18,000. Total for
 west was over \$7000.

Rod mentioned that the water is ponding from Tom Wilcock's headgate to Carl's. It would be good to address how to make water pond less and move faster through the ditch at that spot.

Rod mentioned that when Tom uses the third stream how to not pond the water back so far.

West side the trees through Favell's is a problem.

On East side several headgates will have to be rebuilt this spring.

Gain suggested everyone take a turn of getting the water down the canal by volunteering to be water master. He also said he has two big culverts if anyone needed them.

Rich Steed suggested we leave water in another week to ten days to cut snow and ice out of canal before we turn it out for ~~the~~ dry up for spring clean up.

Rod and Mike concurred that the ditch is too narrow through Lerdy Albrecht's and

needs to be widened it with either
a ditcher or backhoe.

Rod moved to keep same directors. Res.
