I will send the watermaster recommendation to the permit holder, who will include that in the formal request. I think you could probably just hold off processing it for a few days and see if you get the request first...☺ thanks.

Cindy,

I have that proof statement in the stack of proofs I need to process. I have not done anything with that particular right yet. Should I process this one now? Will you be sending a formal letter or formal email notifying the Department that the measuring device is not necessary?

Darla – are you processing a proof of BU for this permit? Did you happen to send a measuring device condition letter back to the permit holder? I am going to recommend they request the removal of that condition; I've spoken with Shelley about it. Please let me know the status if you would. I am not positive they've submitted proof as there is nothing scanned, but it was due April 1.

Thanks,
cindy
