Re: Lance Funk Rentals

Dear Mrs. Skaggs:

Attached to this letter are four lease applications for water rights 35-7699, 35-2084, 35-13578 and 35-13588 owned by Richard and Myrna Winburg and two rental applications for Lance Funk. It is desired to utilize the proposed leased water as the rental water.

Richard and Myrna Winburg desire to lease to the Idaho Water Supply Bank all of water right 35-7699, 35-2084, 35-13578 and 35-13588.

Water right 35-7699 is valid for 1.62 cfs and 155 acres. Water right 35-2084 is valid for 1.5 cfs and 100 acres. Water right 35-7699 and 35-2084 have combined limits of 3.10 cfs, 620 afa and 155 acres. Both of these water rights were enrolled in the CREP program in 2006 but the contracts have been terminated.

Water right 35-13578 is valid for 2.12 cfs, 424 afa and 106 acres.

Water right 35-13588 is valid for 3.02 cfs, 604 afa and 151 acres.

All four of these water rights are ground water rights that have been fully utilized by the Winburg's. These water rights will be leased to the Idaho Water Supply Bank for the 2013, 2014 and 2015 irrigation season. The land currently irrigated will be irrigated with canal shares from the Aberdeen Springfield Irrigation Company during 2013, 2014 and 2015. Canal shares have not historically been used on the properties identified within the POUs of these water rights.

Lance Funk is submitting applications to rent water for Field 55 and the Toevs two pivots for 264 acres. Field 55 is located in T07 South R29 East Section 7 SE. This field is currently planted in grain but will not be irrigated until the

rental application is approved by IDWR. Water for this field will be provided by an existing well in an adjacent field. Warranty deeds verifying ownership of Field 55 and the adjacent field are attached to the rental application. The desired rental period will be for three years.

The second rental application is to cover two pivots owned by William Toevs and covers two pivots for a total of 264 acres in T04S R31E Section 16 SW and SE. Lance Funk had a long term farm lease agreement with Reid Stewart before William Toevs purchased the two pivots and water rights. The long term farm lease agreement will be upheld by Willam Toevs and Lance Funk. The water rights (35-13609, 35-7246M, 35-7632A) that are decreed for the 264 acres are currently leased to the water supply bank and are rented from the water supply bank by Lance Funk.

At the time of the lease and rental applications were submitted for 35-13609, 35-7246M, 35-7632A it was unclear if water would be available to cover the 264 acres. Because the rental applications to utilize 35-13609, 35-7246M, 35-7632A were already submitted to IDWR before the Winburg water rights were identified for use, the lease of 35-13609, 35-7246M, 35-7632A were not withdrawn. It is expected that water right lease for 35-13609, 35-7246M, 35-7632A will be withdrawn at the end of the 2013 irrigation season and will be utilized to irrigated the 264 acres in which they are decreed.

The rental application for the 264 acres is for a period of three years but will be amended or withdrawn at the end of the 2013 irrigation season. Grain has been planted in the 264 acres and will not be irrigated until the rental application is approved.

Please contact me regarding any questions that you may have for these applications.

Sincerely,

Greg Sullivan, M.S.
