RE: Permit No 81-12002

Please reconsider and issue an extension to me for my beneficial use of my water storage system of irrigation/fire protection on my property at 111 Swiftwater Rd, Kooskia, ID 83539. I received the proper notice not on Jan 31 2013, but rather in March, as this property is used primarily on weekends in the summer. I have been traveling extensively this winter and spring, and will not return to my property until after the 1st of May, at which time we can schedule an inspection at a mutually-agreed upon time.

In preparing this letter I realized that I have misplaced the forms required for the inspection. There has been no further construction since the pump and irrigation system were installed last fall. Please resend the proper forms to my address listed above in Pullman.

I truly wish to comply with all regulations, and am pleased that I was granted this water allocation.

Sincerely,

A Morgan Wright
