RE: Water Right Permit No. 65-13731

Second and Final Notice

Dear Permit Holders:

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit:

_____ **Point(s) of Diversion**

_____ **Place(s) of Use**

 X **Other**

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within 14 days. **This is the second and final notice.**

If an amendment is not received within the specified time period, the Department will move forward to issue the license for the extent of beneficial use developed in accordance with the existing permit. However, this will most likely not reflect the full extent of actual development.

If you have any questions, please call me at 208-287-4872.

Sincerely,

Glen Gardiner
Water Rights Section
