RE: Water Right Permit No. 57-07385

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, there were 77 acres currently irrigated under this system that are not described under this permit in the E $\frac{1}{2}$ of the NE $\frac{1}{4}$ of Section 17 in Township 3 South, Range 1 West. Those acres will be included with this amendment. I have discussed this with Mike Ihli who accompanied me on the field visit, and these acres were supposed to have been included.

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within 14 days.

If you have any questions, please contact me.

Sincerely,

Daniel A. Nelson
