RE: Water Appropriation Permit 75-14466

### Request for Information

Dear Permit Holders:

In 2009 IDWR issued permit 75-14466 authorizing the development of a right to divert 0.03 cfs of water from Lake Creek, tributary to the Salmon River, within the NENE of Section 2, Township 19 North, Range 21 East, B.M. and NWNW of Section 1, Township 19 North, Range 21 East, B.M., for irrigation use.

The final step in the water appropriation process is the issuance of a Water Right License. By issuing a license, IDWR recognizes that water has been put to beneficial use in accordance with the permit. For your convenience, I am enclosing a copy of permit listed above.

In an attempt to expedite the licensing process, IDWR would like for you to provide the following information regarding your permit:

|                                 |                                                                                                                                                                                                                             |  |
|---------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Point of Diversion Information: | Photographs of the pump and the point of diversion at Lake Creek. The location of the pump in relation to the nearby ditch diversion out of Lake Creek. If possible, GPS coordinates of pump location – latitude/longitude. |  |
| Pump Information:               | Make, Model, Serial Number, and Horse Power of Pump                                                                                                                                                                         |  |
| Sprinkler Information:          | Size of water line. Size, type, number of nozzles and gallon per minute of sprinklers.                                                                                                                                      |  |
|                                 |                                                                                                                                                                                                                             |  |

Permit 75-14466 includes the following conditions:

# 5 Prior to diversion of water under this right, the right holder shall install a lockable device, subject to the approval of the Department, in a manner that will provide the Watermaster suitable control of the diversion.

#6 The right holder shall install or construct a straight length of conduit or ditch suitable for installation of a device for measuring the entire follow of water being diverted in connection of this right. If the right holder uses a conduit, the straight length of conduit shall be at least ten times the diameter of the conduit and shall be above ground or otherwise easily accessible.

|                 |                                                                                                                                      |  |
|-----------------|--------------------------------------------------------------------------------------------------------------------------------------|--|
| Photographs of: | A lockable device attached to the diversion that will provide the <b>Watermaster</b> control of the diversion.                       |  |
|                 | A straight length of conduit or ditch suitable for installation of a device for measuring the entire follow of water being diverted. |  |
|                 |                                                                                                                                      |  |

The photographs submitted should be of sufficient number and at sufficient angles in order to confirm compliance with the conditions listed on the permit.

In addition, I have enclosed a map of the identified Place of Use for permit 75-14466. Based on the map provided and the 2011 NAIP imagery, 0.7 acres of irrigation have been identified. If additional acreage is being irrigated, please indicate where on the provided map and photographs of the additional irrigated acres. Please note that impermeable surfaces such as homes and driveways cannot be included in the irrigated acreage.

Please provide the requested information within the next sixty (60) days. Please contact the Department if additional time to provide the information is needed.

If you have any questions, please contact me at 208-287-4938. Thank you for your attention to this matter.

Respectfully,

A handwritten signature in cursive script, appearing to read "Danielle Favreau".

| 1. | R67 | This right when combined with all other rights shall provide no more than 0.03 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the lands above.                                                                                                                                                                                                             |
| 2. | 198 | When notified by the Department or by a watermaster with regulatory authority over this right, the right holder shall report the amount of water diverted in connection with this right. The report shall be submitted in the manner and frequency specified by the Department or the watermaster.                                                                                              |
| 3. | 01H | Prior to diversion of water under this right, the right holder shall install a lockable device, subject to the approval of the Department, in a manner that will provide the watermaster suitable control of the diversion.                                                                                                                                                                     |
| 4. | 196 | The right holder shall install or construct a straight length of conduit or ditch suitable for installation of a device for measuring the entire flow of water being diverted in connection with this right. If the right holder uses conduit, the straight length of conduit shall be at least ten times the diameter of the conduit and shall be above ground or otherwise easily accessible. |
| 5. | 029 | Prior to the diversion and use of water under this approval, the right holder shall comply with all fish screening and/or fish passage requirements of the Idaho Department of Fish and Game.                                                                                                                                                                                                   |
