RE: Combined use limit conditions

In my field report, I made a comment that an overlapping condition will not apply on this license that appears on license 37-8345 which shares a PD. That conditions states: Use of this right (37-8345) with the rights listed below is limited to a total combined diversion rate of 0.87 cfs. The combined rights include 37-4010, 37-8362, and 37-8371.

However, Shelley Keen reminded me that license 37-8345 is defined by the combined extent of the rights and cannot be ignored. I will add the condition to the license.
