

Memorandum

Date: March 8, 2013

To: File 63-12590

From: Craig L. Saxton

Re: Supplemental Review information

Source:

The source was permitted as Drain Ditch #3. Other water rights that appear to be from the same source are identified as **Unnamed Drain** and contain a B01 conditions stating that the source is also known as **Drain Ditch #3**.

In addition 63-4437 was claimed in the SRBA with the source identified as **Drain Ditch No. 3**. It was split into A, B, and C portions and all three portions were eventually decreed with the source being described as **Unnamed Drain**. 63-4437B belongs to the permit holder and is diverted from the same point as this right.

Recommend the source be licensed as **Unnamed Drain** with a B01 condition identifying the local name as Drain Ditch #3.

POU Description:

The POU is in un-surveyed accretion land. The quarter-quarter description that the POU is described with, was derived from extending known section and quarter-section lines across the accretion land. The QQ is consistent with the QQ description of adjacent right held by Leigh, 63-4437B.
