RE: Water Right Permit No. 86-7129 and Relinquishment of Water Right Permit No. 86-7374

Dear Permit Holder(s):

The Department of Water Resources is reviewing permit no. 86-7129 prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit.

During my examination of your system I found that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

The following elements were developed differently than described on your permit:

☒ **Points of Diversion**

☒ **Place of Use**

☒ **Other (change the water use to Municipal)**

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within 14 days.

Secondly, it appears that permit no. 86-7374 provides no additional beneficial use above and beyond what 86-7129 provides. If you have not developed a beneficial use of water within the development period authorized by permit 86-7374, no license can be issued and your permit can be relinquished. I have enclosed a relinquishment form for your use.

If you have any questions, please call me at (208) 287-4944.

Sincerely,

A handwritten signature in cursive script that reads "Cherie Palmer".
