FORM 202 03/10 Print form as a 2 page, single-sided document

STATE OF IDAHO DEPARTMENT OF WATER RESOURCES

WATER RESOURCES WESTERN REGION

Permit No. 67-15088

APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

1. Name of applicant(s) Steven F. Ryals Phone 208-484-1722
Name connector (check one): ☐ and ☐ or ☐ and/or

Mailing address: 2429 Happin LN City Council
State ID Zip 83612 Email: Steve@Ryals.net

2. Source of water supply groundwater which is a tributary of —

3. Location of point(s) of diversion:

Twp	Rge	Sec	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
~~12N~~	~~2W~~	~~8~~		~~NE~~	~~SE~~		~~Washington~~	~~New well~~	
~~12N~~	~~2W~~	~~8~~		~~NW~~	~~SW~~		~~Washington~~	~~New well~~	
12N	2W	8		NE	NW		Washington	proposed well	

4. Water will be used for the following purposes:

Amount 2.0 cfs for irrigation purposes from 4/15 to 10/15 (both dates inclusive)
(cfs or acre-feet per year)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)

5. Total quantity to be appropriated is (a) 2.0 cubic feet per second (cfs) and/or (b) _____ acre-feet per year (af).

6. Proposed diverting works:

a. Describe type and size of devices used to divert water from the source. 12" well 75 h.p.

b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 11.

For dams 10 feet or more in height OR reservoirs with a total storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☐ No

c. Proposed well diameter is 12" inches; proposed depth of well is 200 feet.

d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ No

e. If well is already drilled, when? _____; drilling firm _____;
Well was drilled for (well owner) _____; Drilling Permit No. _____

7. Description of proposed uses (if irrigation only, go to item 8):

a. Hydropower; show total feet of head and proposed capacity in kW. _____

b. Stockwatering; list number and kind of livestock. _____

c. Municipal; show name of municipality or the applicant's qualifications as a municipal provider. _____

d. Domestic; show number of households _____

e. Other; describe fully. _____

AMENDED
changes made by
SPK 3/1/13

8. Description of place of use:

a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.

b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
12 N	2 W	8	~~40~~			40		40	40										160
12 N	2 W	8		40	40		40			20									140

Total number of acres to be irrigated: ~~160~~ 140

9. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? none

10. a. Who owns the property at the point of diversion? Steven Ryals
b. Who owns the land to be irrigated or place of use? Steven Ryals
c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: _____

11. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. Drill a 12" well close to power on Farm to Market Rd. Install a pipe to center of proposed irrigated area & install a center pivot to water area

12. Time required for completion of works and application of water to proposed beneficial use is 5 years (minimum 1 year).

13. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map clearly identifying the proposed point of diversion, place of use, section #, township & range. A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

Re: Application No. 67-15088

Dear Interested Parties:

Attached are copies of one or more applications that may be of interest to you. Please contact the applicant if you have concerns about the application.

If you desire to file a formal protest against approval of the application, a written protest along with the \$25.00 protest fee for each application protested must be received in this office by April 22, 2013. A copy of the protest must also be sent to the applicant.

Please contact this office at 208-334-2190 if you have any questions regarding the application, or you may visit our website at www.idwr.idaho.gov.

Sincerely,

A handwritten signature in blue ink that reads "Rachel Sommer". The signature is written in a cursive, flowing style.

Re: Application for Permit No. 67-15088

Dear Applicant:

As we discussed in handling your request for expedited processing, the Idaho Department of Water Resources (IDWR) seeks additional information to support your proposed ground water irrigation use. Enclosed is a map showing property owners with wells in your area. According to IDWR records, there are no wells to the south between your property and Crane Creek Reservoir.

Most of the owners shown on the map west and northwest of your site were involved in the Heck application process and its preceding Parker application process. Most of the other owners were not involved in that earlier history but have wells within about 1 to 1.25 miles from your proposed well. Most wells in the area are shallow, about 200 feet or less, similar to your proposed well. Most if not all of those wells are for domestic use.

Please provide the following information to support your application.

- 1) Water Supply – Information should show an adequate ground water supply in your area. This should include the cumulative water supply scenario for your proposed development when combined with potential development authorized for Heck under Permit No. 67-14750. A copy of that permit was provided in the recent IDWR letter.
- 2) Injury to Other Well Owners – Information should show the likely impacts on wells for owners shown in the enclosed map. Impacts do not necessarily constitute injury. An impact could be considered something measureable, while injury is more of a legal consideration regarding impacts. However, some information is needed to estimate impacts in order to evaluate the likelihood of injury. Your information about impacts/injury should include some perspective on your proposed development when combined with potential development authorized for Heck.

Application for Permit No. 67-15088

March 22, 2013

Page 2

This above information is typically provided by qualified professionals. Since you are not applying for a large rate of flow, your reply does not necessarily need to be an exhaustive study but should provide a reasonable basis to address water supply and injury issues. The consultant list sent earlier might be helpful in that regard.

Please provide the requested information within the next ninety (90) days. You may seek additional time to provide the information by making a written request to interrupt processing for up to six months. The application will be voided without a timely written reply. Refunds are not issued for voided applications.

Please contact me at 208-334-2190 if you need more information. Thank you for your attention to these matters.

Sincerely,

Steve:

Received your 3/18/2013 letter. Thank you for that thorough reply. Based on the letter, your application will be expedited as requested.

Legal notices should be published in the Weiser newspaper the first two weeks of April with a protest deadline April 22. Allow two more days after that to determine if any protests are filed.

Meanwhile, I will send you a letter requesting information about water supply and injury issues. Please let me know if you have any questions.

Re: Application # 67-15088
Steve Ryals

This letter is in response to your letter requiring more information on the proposed well and water right. I had applied for a water right on this property in 2009 but had different intentions for the land. We had hoped to divide the land into four 30 acre lots and provide some irrigation for each of the lots. Washington County turned down our application for this division into the 4 lots and determined that the land was "prime ag" even though it is "dry land farming". After doing cost analysis...it was determined that the most practical use of the land was to irrigate it to increase the yield potential of the land. That is why we are applying for the water right again.

I have phoned Dennis Heck of Caldwell regarding his water right...#67-14750. He has not returned any of the calls I have made. I have left messages every time but have not heard back. He did do quite a bit of work last year in the area of his water right, but I am not sure if any wells were drilled. They did dig a pond and brought water underneath the road to a piece on the south side of Farm to Market Rd.

In regards to my application...#67-15088

1. I have contacted Idaho Power about the availability of power in the area to run the well. They have said there is adequate power if I use a rotophase to convert it from 1 phase to 3 phase.
2. I have worked with AgriLines of Parma on a design and cost for a center pivot irrigation system for the area that can be irrigated (100 to 120 acres). They have provided a cost and time frame for installing it.
3. I have contacted Rob Dawson of Dawson Drilling in Cambridge about drilling an irrigation well of the size needed for this center pivot. He has researched it...talked to the drilling inspector about what he would require for sealing it...looked up logs in the area...and given me an approximate price based on a 200 ft. drilling level.
4. Grunfos Pumps has provided the pump info. and cost for a pump capable of pumping the 2 cfs. requested in the application.

RECEIVED

MAR 20 2012

WATER RESOURCES
WESTERN REGION

5. I talked to both the farm service agency in Weiser and the ag. extension agent about potential crops that could be raised. We did cost analysis based on both dryland and irrigated land projections. Even though the cost of the irrigation project is quite substantial...the benefits of the irrigation justify the cost if amortized over 10 years or so.
6. I talked to several farmers in the Cambridge/ Midvale area who have recently installed center pivot irrigation systems. I was mostly interested in the yield increases they had found based on irrigated land vs. dry land.
7. All of the costs associated with this project have been obtained and the money for the project is available if the water right is approved.
8. If the water right is approved, I do plan to go ahead with the project. I had hoped to have it in and working by summer of 2013. That is why I was hoping to expedite the application.

A handwritten signature in black ink, appearing to read 'Steve Ryals', with a stylized, cursive script.

Re: Application for Permit No. 67-15088

Dear Applicant:

You filed the above referenced application this January 22 and requested expedited processing on March 1. As you know, your prior application 67-14912 filed in 2007 was voided in 2009 for failure to provide information the Idaho Department of Water Resources (IDWR) needed to evaluate that application.

Your replacement application is for somewhat less water and fewer acres but still raises concerns similar to last time. IDWR is willing to expedite your application under the terms identified below. Please be aware that a refund is not possible once an application has been published in the newspaper legal notices. Items 1 and 2 require your reply but the other item does not.

- 1) What is different this time with respect to your willingness and ability to provide additional information about water supply and potential injury to other ground water rights/uses, including but not limited to domestic wells in the area? In other words, why should your application be expedited given the prior experience?
- 2) Heck Permit No. 67-14750 was approved in 2008 for 4.00 cfs ground water irrigation just west of your property, as you know. IDWR is not aware of any significant progress in that project. Please provide written comments from Heck regarding your application. These comments do not commit Heck to do or not do anything but are useful to gauge concern from the owner of the most recent approval IDWR issued in your area. A copy of Heck's permit is enclosed for your convenience.
- 3) If your application is expedited, IDWR will send comment letters to well owners in the area identified in the enclosed map. Later, IDWR will request additional information from you for your application.

Please return the completed withdrawal form if you decide not to pursue your application, A refund will be issued in that case (\$290). Otherwise, please submit the requested information for the application to

be processed. You may seek additional time to provide the information by making a written request to interrupt processing for up to six months. The application will be voided without a timely written reply within the next thirty (30) days. Refunds are not issued for voided applications.

IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please contact me at 208-334-2190 if you need more information. Thank you for your attention to these matters.

Sincerely,

A handwritten signature in black ink, appearing to read "Steve Lester". The signature is fluid and cursive, with the first name "Steve" written in a larger, more prominent script than the last name "Lester".

CONDITIONS OF APPROVAL

1. Proof of application of water to beneficial use shall be submitted on or before **August 01, 2013**.
2. Proof of application of water to beneficial use shall be submitted no sooner than June 1, 2013.
Upon filing proof of beneficial use for this right, the right holder shall include a report from a qualified professional acceptable to the Department summarizing hydro geologic data collected under the conditions of approval of this right. The purpose of the report is to verify that senior right holders of wells noted on Attachment A have not been injured by the diversion and use of water in connection with this right.
3. Subject to all prior water rights.

COPY

SCANNED

MAR 15 2013

State of Idaho
Department of Water Resources
Permit to Appropriate Water
NO. 67-14750

4. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.
5. Any well used as a point of diversion for this right shall be cased with impermeable casing into or through the first confining layer below ground surface to prevent diversion of water having a direct hydraulic connection to surface water sources within the Weiser River Basin.
6. This right is limited to the irrigation of 200 acres within the place of use described above in a single irrigation season.
7. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor exceed a combined annual maximum diversion volume of 800 af at the field headgate for the 200 acres of land authorized to be irrigated in connection with this right.
8. This right when combined with all other rights shall provide no more than 4.0 afa per acre at the field headgate for irrigation of the lands above.
9. The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right for lands also authorized to be irrigated using surface water rights to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate any lands authorized to be irrigated in connection with this right.
10. If the surface water right(s) appurtenant to the place of use is abandoned, forfeited, sold, transferred, leased or used on any other place of use, this right to divert ground water shall not be used to replace the surface water supply without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
11. For the first five years of use under this right, the right holder shall provide semi-annual written notification to the owners of surrounding wells identified in Attachment A regarding the diversion of water for irrigation purposes in connection with this right. Notification shall occur approximately fourteen (14) days prior to the first diversion of water at the beginning of each irrigation season and approximately fourteen (14) days following the end of each irrigation season. To verify compliance with this condition, the right holder shall provide the Department with copies of the written notices.
12. Prior to diversion of water from any existing point of diversion for this right and/or prior to Department approval for the construction of any additional wells to be used as points of diversion for this right, the right holder shall submit an operations plan for Department approval. The plan shall include specific and credible information demonstrating how the right holder will employ a qualified professional to comply with conditions Nos. 13 through 16 regarding pump tests, observation well(s), collection of flow and volume data from the right holder's irrigation well(s), drawdown and water level measurements from the right holder's irrigation well(s), and any changes in water levels and water production from the observation well(s) described in condition No. 16.
13. The right holder shall conduct a pump test of a least twenty-four hours for each well used as a point of diversion in connection with this water right. The pump test shall be designed and conducted by a qualified professional, such as a hydrologist, geologist, or engineer, and shall be approved by the Department before being conducted. The pump test shall measure all standard parameters associated with pump tests for the right holder's irrigation well being tested and for observation well(s) used for the pump test. The right holder shall keep records of the data collected during the pump test and shall make them available to the Department upon request.

SCANNED

MAR 15 2013

State of Idaho
Department of Water Resources
Permit to Appropriate Water

NO. 67-14750

14. The right holder shall install measuring devices acceptable to the Department on all points of diversion authorized under this right. The measuring devices shall be capable of displaying instantaneous diversion rates and totalized volume measurements. The right holder shall record rate and volume measurements monthly for any calendar year during the first five irrigation seasons in which water is diverted in connection with this right and shall make the records available to the Department upon request. One measurement shall be in April for each year the wells are being used.
15. All existing or newly constructed wells used as points of diversion for this right shall include measuring tubes or other suitable methods to allow measurement of water levels. The right holder shall measure water levels for all existing or newly constructed wells used as points of diversion for this right. Wells not used as active points of diversion can serve as additional observation wells beyond the requirements of condition No. 16. For at least the first five (5) years of water use under this right, measurements shall be made monthly for any calendar year that water is being diverted and used. One measurement shall be in April for each year the wells are being used. The right holder shall keep records and make them available to the Department upon request.
16. The right holder shall install a continuous data logger in the observation well located in NW1/4NW1/4NW1/4 Section 8, T12N, R2W, currently known as the Roe Well, to record water level measurements for the observation well for at least five years from the beginning of the diversion and use of water in connection with this right. The first water level measurement for the observation well shall precede any irrigation under this right to establish baseline data for the observation well. An alternate observation well can be substituted for the Roe Well, subject to the approval of the Department. The right holder shall provide written confirmation to the Department upon installation of the data logger in the observation well. The right holder's access to the observation well and installation and maintenance of the data logger are civil matter between private parties; they are not enforceable by this right.
17. For the observation well noted in condition No. 16, the right holder shall determine the cumulative water level decline during April of each year as follows: determine the historical ground water decline by subtracting the current April ground water level from the initial ground water level measured for the observation well after right 67-14750 was approved. The right holder shall keep records from the data logger and make them available to the Department upon request.
18. Upon detection of a cumulative water level decline of ten (10) feet or more in April static water levels for the observation well, the right holder shall immediately cease pumping and shall notify the Department in writing. The Department shall require additional testing by the right holder to determine if the use of this right has injured senior right holders. Irrigation shall not resume until the Department has issued written notification to the right holder that either (a) the right holder has demonstrated injury has not occurred, or (b) the right holder has demonstrated injury has occurred but the diversion and use under this right have not caused the injury, or (c) the right holder has demonstrated injury has occurred and that the right holder has mitigated the injury. A mitigation plan must be approved by the Department prior to any mitigation activity.
19. After specific notification by the Department, the right holder shall annually submit a measurement report to the Department. The report shall include the rate, volume and water level data for the irrigation wells authorized by this right and all data from the observation well required under condition No. 16 plus all data from all other wells also used for monitoring purposes.
20. The Director retains jurisdiction to require the right holder to provide purchased or leased natural flow or stored water to offset depletion of Lower Snake River flows if needed for salmon migration purposes. The amount of water required to be released into the Snake River or a tributary, if needed for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this permit.
