

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

Transfer No.

78483

RECEIVED

FEB 06 2013

DEPT. OF WATER RESOURCES
SOUTHERN REGION

MINIMUM REQUIREMENTS CHECKLIST
TO BE SUBMITTED WITH APPLICATION FOR TRANSFER

An application for transfer must be prepared in accordance with the minimum requirements listed below to be acceptable for processing by the Department. Incomplete applications will be returned. The instructions, fee schedule, Part 2A reports and additional Part 2B forms are available from any Department office or on the Department's website at <http://www.idwr.idaho.gov/>.

Check whether each item below is *attached* (Yes) or *not applicable* (N/A) for the proposed transfer.

- Yes N/A** * Means the item is always required and must be included with the application.
- ☒ * Completed Application for Transfer of Water Right form, Part 1.
 - ☒ * Signature of applicant(s) or applicant's authorized representative on Application for Transfer Part 1. Include evidence of authority labeled Attachment #3 (see below) if signed by representative.
 - ☒ * Application for Transfer Part 2A. Attach a Part 2A report describing each water right in the transfer as currently recorded.
 - ☐ ☒ Complete and attach an Application for Transfer Part 2B for each water right for which only a portion is proposed to be changed through this transfer application
 - ☒ * Application for Transfer Part 3A is always required (see Attachment #7a below); Parts 3B and 3C must be completed for transfer applications proposing to change the nature of use of the water right(s) or proposing changes to supplemental right(s).
 - ☒ * Correct fee submitted with transfer application form. (Fee schedule is on website and instructions for application for transfer.)

Attachments to Application - Label each attachment with the corresponding number shown below as Attachment #1-9.

- ☐ ☒ #1 If the applicant is a business, partnership, organization, or association, and not currently registered in the State of Idaho as a business entity, attach documentation identifying officers authorized to sign or act on behalf of right holder. (See Part 1.)
- ☐ ☒ #2a Water Right ownership documentation if Dept. records do not show the transfer applicant as the current water right owner.
- ☐ ☒ #2b If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s).
- ☐ ☒ #3 Documentation of authority to make the change if the applicant is not the water right owner.
- ☐ ☒ #4 Power of Attorney or documentation providing authority to sign or act on the applicant's behalf. (See Part 1.)
- ☐ ☒ #5 If the transfer application proposes to change the point of diversion for a water right affecting the Eastern Snake Plain Aquifer (ESPA), attach the results of an ESPA analysis and a detailed mitigation plan to offset any depletions to hydraulically connected reaches of the Snake River. ESPA transfer spreadsheet and model grid labeled cells are available on the Department's website at <http://www.idwr.idaho.gov/water/rights/>.
- ☐ ☒ #6 Notarized statement of agreement or a statement on official letterhead signed by an authorized representative from each lien holder or other entity with financial interest in the water right(s) or land affected by the proposed transfer. (See Part 1.5.c.)
- ☒ * #7a Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described on the application. Include legal description labels. If only a portion of the right is proposed to be changed, identify the current location of the part of the existing right(s) proposed to be changed. (See Part 3A.)
- ☒ ☐ #7b If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use.
- ☐ ☒ #8a If the transfer application proposes to change the nature of use or period of use for one or more rights, provide documentation describing the extent of historic beneficial use for the water rights proposed to be transferred and document how enlargement will be avoided. (See Part 3B.)
- ☒ ☐ #8b If the transfer application proposes to change the place of use of a supplemental irrigation right, provide documentation regarding the historic use of the supplemental right(s) and availability or reliability of the primary right(s) being supplemented, both before and after the proposed change. (See Part 3C.)
- ☐ ☒ #9 Other. Please describe: _____

A. PURPOSE OF TRANSFER

1. ☒ Change point of diversion ☐ Add diversion point(s) ☒ Change place of use
☐ Change nature of use ☐ Change period of use ☐ Other _____
2. Describe your proposal in narrative form, including a detailed description of non-irrigation uses to justify amounts transferred (i.e. number of stock, etc.), and provide additional explanation of any other items on the application. Attach additional pages if necessary and label it **Part 1A.2**. Transfer to move ground water right into and existing ppu that currently has some surface water rights and add to the volume of water available to irrigate with at this location. Ground water will remain supplemental and is expected to deliver same volume has historically utilized.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR TRANSFER OF WATER RIGHT
PART 1 Continued

B. DESCRIPTION OF RIGHTS AFTER THE REQUESTED CHANGES. IF THE RIGHTS ARE BEING SPLIT, DESCRIBE PORTIONS TO BE CHANGED AS THEY WOULD APPEAR AFTER THE REQUESTED CHANGES.

1.	Right Number	Amount (cfs/ac-ft)	Nature of Use	Period of Use	Source & Tributary
All or Part ☒ ☐	45-2363	1.0/360	Irrigation	4/01 to 10/31	Ground Water
☒ ☐	45-14377	0.32/	Irrigation	3/15 to 11/15	Mill Creek/ Sinks
☒ ☐	45-14379	1.3/	Irrigation	3/15 to 11/15	Mill Creek/ Sinks
☒ ☐	45-14381	0.11/	Irrigation	3/15 to 11/15	Mill Creek/ Sinks
☒ ☐	45-14381	0.02/1.2	Stockwater	1/01 to 12/31	Mill Creek/ Sinks
☐ ☐				to	
☐ ☐				to	
☐ ☐				to	
☐ ☐				to	

Total authorized under rights 2.75 cfs and/or 425.7 ac-ft

2. Total amount of water proposed to be transferred or changed 2.75 cubic feet per second and/or 361.2 acre-feet per annum.

3. Point(s) of Diversion:

- ☐ No changes to point(s) of diversion are proposed-the following chart is therefore not completed. (Proceed to #4.)
☐ Attach Eastern Snake Plain Aquifer analysis if this transfer proposes to change a point of diversion affecting the ESPA.
 Label it Attachment #5.

New ?	Lot	¼	¼	¼	Sec	Twp	Rge	County	Source	Local name or tag #
			NW	SW	36	13S	22E	CASSIA	GROUND WATER	
			NE	SE	36	13S	22E	CASSIA	Mill Creek	

4. Place of use: (If irrigation, identify with number of acres irrigated per ¼ ¼ tract.)

- ☐ No changes to place of use are proposed-the following chart is therefore not completed. (Proceed to #5.)

Twp	Rge	Sec	NE ¼				NW ¼				SW ¼				SE ¼				Acre Totals
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
13S	22E	35		17.8	40										33	40			130.8

*Irrigation will be limited to 90.0 acres within PPU

Total Acres (for irrigation use) 130.8 PPU*

T13S R22E S35	NESE	33.00	T13S R22E S35	NWSE	40.00

Total Acres: 130.8

Conditions of Approval:

1. T19 Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.
2. T07 The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
3. X27 This right is limited to the irrigation of 78.2 acres within the authorized place of use in a single irrigation season.
4. X35 Rights 45-14377, 45-14379, and 45-14381 when combined shall not exceed a total diversion rate of 1.73 cfs and the irrigation of 115 acres.
5. 206 The rights in Transfer 77600 are limited to the irrigation of a specific 115.0 acres within the 130.8 acre place of use authorized by these rights in a single irrigation season. The specific 115.0 acres to be irrigated by the right holder are shown in the electronic shape file associated with these rights in the geographic information system component of the water rights database maintained by the department. Before changing the 115.0 acres to be irrigated within the 130.8 acre place of use, the right holder shall submit a new land list and representative electronic shape file or map to the Department prior to the irrigation season in which the change will occur.
6. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
7. R64 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.
8. R05 Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 45A.
9. C22 Priority of appropriation shall give the better right as among those using the surface and ground waters of Mill Creek, Warm Springs, Spring Creek, Summit Creek, and their tributaries, and rights having the same priority date shall share equally in the available water supply in a manner that will equally apportion all natural channel losses among rights having the same date of priority. For example, if there are seven points of diversion from the natural channel, which have the same 1879 date of priority, and the flow in the stream is equal to one-half of the amount of flow necessary to fully satisfy all of the 1879 priorities at their respective points of diversion, then the diversion rates at each of the seven points of diversion shall be reduced by one-half. A pro rata sharing of the water in the stream shall continue to be enforced among rights of equal 1879 priority until the watermaster shall have determined that water in the stream is inadequate to reach a downstream 1879 point of diversion in a sufficient quantity to be applied to beneficial use. Thereafter, upstream 1879 appropriators who are still able to receive water in a sufficient quantity to be applied to beneficial use shall continue a pro rata sharing of the water in the stream.
10. R43 The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion.

10. R43 The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion.

Decreed Date: 1/8/2007

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR TRANSFER OF WATER RIGHT
PART 1 Continued

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future: Existing well at above listed pod. Piping and pumps to supply water to pivots, flow meters can be installed for measuring devices if required.

- b. Who owns the property at the point(s) of diversion? Howard & Karen Robinson
If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system: _____

- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?
If yes, ☐ Attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien: N/A

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

- d. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer: The lands which this water right is applicable has Oakley anal Co. shares associated with it. This right is currently in the water supply bank.

- e. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use: The existing water right at the proposed place of use are; 45-13477, 45-14379 and 45-14381 with combined limits of 115 acres with in 130.8 ppu, 1.73 cfs., all have Mill Creek water source. Water right 45-11747 has the same ground water pod as proposed point of diversion for the amount of 0.12 cfs/13,000 gpd for 500 range cattle.

- f. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes No

- | | | |
|-------------------------------------|-------------------------------------|---|
| ☐ | ☒ | undergone a period of five or more consecutive years of non-use, |
| ☒ | ☐ | currently leased to the Water Supply Bank, |
| ☐ | ☒ | currently used in a mitigation plan limiting the use of water under the right, or |
| ☐ | ☒ | currently enrolled in a Federal set-aside program limiting the use of water under the rights? |

If yes, describe: Enrolled into water supply bank in 4/9/2012.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR TRANSFER OF WATER RIGHT

PART 2

A. DESCRIPTION OF RIGHT(S) AS RECORDED

For each water right listed in Part 1B.1 of the application, attach a **Part 2A** report obtained from any Department office or from the Department's website @ <http://www.idwr.idaho.gov/> , Water Right Transfers, Step 1.
Insert Part 2A reports into the application following Part 1.

B. IF ONLY A PORTION OF THE RIGHT IS PROPOSED TO BE CHANGED, DESCRIBE THE PORTION BEING CHANGED AS IT APPEARS BEFORE THE REQUESTED CHANGES

- ☐ Complete and attach one copy of Part 2B for each right for which only a portion is proposed to be changed. If the entire right is proposed to be changed, Part 2B is not applicable. Additional copies of the **Part 2B** form can be obtained from any Department office or from the Department's website @ <http://www.idwr.idaho.gov/> , Water Right Transfers, Step 3, or Water Right Forms, Changes in Use. Insert completed Part 2B forms into the application following Part 2A of the same water right.

Right Number:

- [illegible]

2. Lands irrigated or place of use: (If irrigation, identify with number of acres irrigated per $\frac{1}{4}$ $\frac{1}{4}$ tract.)

[illegible]

Total Acres (for irrigation use)

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR TRANSFER OF WATER RIGHT
PART 3

A. PLAT MAP (See Part 3A of Instructions for application for transfer for complete requirements.)

- ☒ Attach a map of the diversion, measurement, control, and distribution system. Label it **Attachment #7a**.
- ☒ If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. Label it **Attachment #7b**. If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

B. CHANGES IN NATURE OF USE (Water Balance)

- ☐ If you propose to change the nature of use or period of use of all or part of the right(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Also attach documentation showing that the portion of the right(s) to be changed will not be enlarged in rate, volume, or consumptive use through the proposed change. Label it **Attachment #8a**.

C. PLACE OF USE CHANGES TO SUPPLEMENTAL IRRIGATION RIGHTS

- ☒ If you propose to change the place of use of a supplemental irrigation right, answer below and attach supporting documentation. Label it **Attachment #8b**.

1. Describe how the supplemental water rights have been used historically in conjunction with other water rights at the existing place of use. Describe the time during the irrigation season that the supplemental rights have been used. Include information about the availability or reliability of the primary right(s) being supplemented, both before and after the change. If the applicant is proposing to change a supplemental irrigation right to a primary right, provide the information required on Part 3B above.: _____
- Water right 45-2363 has historically been used as supplemental water to canal shares provided by the Oakley Canal Company. Water right 45-2363 was only utilized after the full allotment of canal shares were applied and shut off by Oakley Canal Company. Affidavits by Howard Robinson and Nathan Robinson provide evidence of crops grown from 2001 through 2011 when they owned and rented the property that 45-2363 is currently located. Records from the Oakley Canal Company were obtained to help determine the volume of water provided from the Oakley Canal Company from the years 2001 through 2011.

COMMENTS AND
EVIDENCE OF
Howard Robinson

COMES NOW, Howard Robinson, and provides the following comments and evidence in this matter:

1. I am familiar with the property located in the South West Quarter of Section 27 of Township 13 South, Range 22 East, B.M., as shown in Exhibit A attached to this affidavit, hereafter known as the "Property."
2. I owned the said Property from 1992 to 2011 and have knowledge of the irrigation system, and crops that were irrigated during that time.
3. The crops grown on the Property have consisted of:

Crop: Alfalfa	Year: 2001
Crop: Alfalfa	Year: 2002
Crop: Alfalfa	Year: 2003
Crop: Alfalfa	Year: 2004
Crop: Grain	Year: 2005
Crop: ~~Alfalfa~~ ^{Corn}	Year: 2006
Crop: Alfalfa	Year: 2007
Crop: Alfalfa	Year: 2008
Crop: Alfalfa	Year: 2009
Crop: Sugar Beats	Year: 2010
Crop: Grain	Year: 2011

4. Ground water from 45-2363 has been required every year from 2001 through 2011 for irrigation in addition to shares applied from the Oakley Canal Company on the Property.
5. Water right 45-2363 is leased to the Idaho Water Supply Bank for a period of time from April 9, 2012 through December 31, 2012.

DATED this 2 day of Jan, 2013.

COMMENTS AND
EVIDENCE

COMES NOW, Ryan Cranney, and provides the following comments and evidence in this matter:

1. I am familiar with the property located in the South West Quarter of Section 27 of Township 13 South, Range 22 East, B.M., as shown in Exhibit A attached to this affidavit, hereafter known as the "Property."
2. I am knowledgeable of the management practices on the said Property from the year 2008 to 2011 and have knowledge of the irrigation system, and crops that were irrigated during that time.
3. Ground water was diverted from two ground water wells (see Exhibit B) and applied to the place of use of 45-2363. The years that ground water was applied to the place of use of 45-2363 are: 2008, 2009, 2010, 2011

DATED this 1 day of March, 20 13.

Evaluation of overall mitigation requirements per reach Steady State and Transient State, and Off-Setting Benefits (sum of reach debits only where mitigation is required and credits)

Carry out one way analysis. If reach depletions go up, it is a debit, if they go down, it is a credit. Sum all debits, only where mitigation is required (dark yellow), and all credits (light yellow). Mitigation is required for the full amount of the summed values if greater than zero.

Steady state analysis represents permanent mitigation requirements at future steady state (or last timestep from the ESPAM Transfer Tool model run).

Transient state analysis represents mitigation requirements for the worst or maximum time step in the model run.

Evaluation of transient state mitigation requirement is not comprehensive across all time steps. Instead this evaluation finds the maximum stream depletion following the start of the transfer and looks at depletion amounts from that time step. In many instances this depletion is greater than the depletion associated with the steady state condition or final time step. This evaluation is merely an indicator of whether transient depletions must be considered, not an indicator of all transient impacts.

Evaluation of Permanent Mitigation Efforts (non-use, acreage conversion, etc.) in Ashton to Off-Setting Transfer Benefits - Steady State Evaluation Only

Set Aside 1 (Non-Use/Designation):

WR No.	Div. Rate (CFS)	Con. Vol. (AF)	No. of Irr. Acres	Priority Date	POD Location	Dedicated Vol. (AF/yr)	Model Node
--------	-----------------	----------------	-------------------	---------------	--------------	------------------------	------------

Non-Use: Proposed Steady State Impacts following Change

Non-Use 1: Worst Case Transient State Impacts following Change

RECEIVED
JUN 22 2011PARSONS, SMITH & STONE, LLP
BUR

15 23. ATTORNEY REPRESENTATION: The firms of Parsons, Smith & Stone, LLP has
16 represented the Landlord in this transaction and the Tenant has been advised that this agreement
17 should be reviewed by an attorney acting in its behalf.
18

19 24. TAX REVIEW: Each of the parties has been advised by the firm of Parsons, Smith &
20 Stone, LLP that the tax ramifications of this agreement should be reviewed by their independent tax
21 advisor prior to closing.
22

23 25. WATER USAGE: Tenant shall have all right of use of the north pond and related
24 pumps, motors, and equipment.

25 The Landlord and Tenant shall have equal right of use of the middle pond and related
26 equipment with each entitled to one-half of the water provided, however, Landlord's use of the
middle pond shall be limited to watering cattle only. The south well, pump, motor and related

1 equipment, associated with the middle pond, will be shared equally between the Landlord and Tenant;
2 provided that Landlord shall be entitled to one-half of the flow of the well but not to exceed 100
3 miners' inches at any time. The parties shall install metering equipment to measure the flow used by
4 each, sharing the expense equally. If the Tenant exercises the option to purchase, these use
5 provisions and the cost sharing provisions set forth in paragraph 6 will be incorporated into a
6 recordable agreement including provisions for reasonable access.
7

8 27. EASEMENT: During the term of the lease the Landlord reserves the right to ingress and
9 egress, including movement of cattle and equipment, on a 25' wide right-of-way along the north and
10 east sides of Section 27 and along the east side of Section 3. Landlord shall be entitled to construct
11 and maintain a roadway upon the right-of-way. The right-of-use shall be appurtenant to other real
12 property owned by Landlord to be designated for the creation of a permanent easement. If Tenant
13 exercises the option to purchase, this right-of-way will be reduced to a written recordable easement

MEMORANDUM

TO: Phil Rassier
FROM: Ann Yribar
DATE: July 10, 2008
RE: Forfeiture and Unauthorized Use of a Water Right.

Question Presented:

Whether a water right holder risks the forfeiture of their water right when they use it in a manner other than was authorized by their license or decree.

Discussion:

In Idaho, it is unlawful for a water right holder to use their water in any way that does not conform with their valid water right, and the director of the department of water resources is authorized to file an action seeking injunctive relief should the person fail to cease the unauthorized use. Idaho Code § 42-351. Any person may, however, make a lawful change to the point of diversion, period of use, or nature of use of their water right by first filing an application with the director of the department of water resources and by showing that no other water right holders will be injured by the change. Idaho Code § 42-108, § 42-222. Accomplished transfers, changes to an element of a water right that occurred prior to November 19, 1987, can be adjudicated and decreed as used even though they failed to comply the requirements of §§ 42-108 and 42-222.

Change in a point of diversion, period of use, or nature of use of a water right does not result in forfeiture. In *Joyce v. Rubin*, a water user moved his point of diversion 1800 feet upstream from where it was originally located. The court found that the water users had the right to move the point of diversion as long as the change did not injure any other water users. 23 Idaho 296, 130 P. 793, 797 (1913). The court stated that even: "if a change is made without proper application to the state engineer . . . that would not forfeit the right to the use of such water." *Id.* See also *Harris v. Chapman*, 51 Idaho 283, 5 P.2d 733 (1931).

In a more recent 2002 order, SRBA Presiding Judge Burdick held that a water right was not forfeited simply because the point of diversion had been changed without authorization by

the department of water resources. *In Re SRBA, No. 39576, Wood v. Troutt, Subcase No. 65-05663B*, (SRBA Dist. Ct., Idaho, May 9, 2002). In that case, Troutt had been forced to move his point of diversion when Wood erected an electric fence which blocked access to the original point of diversion. *Id.* at 26. Wood argued, based on *McCray v. Rosenkrance*, that this change in the point of diversion began a consecutive five-year period of non-use that resulted in forfeiture. 135 Idaho 509, 20 P.3d 693 (2001). (Water right was forfeited through five years of non-use. Place of use was then changed to land not appurtenant to water right. Court held this use insufficient to show resumption of use; forfeiture not defeated). The SRBA court rejected this argument stating *McCray* cannot be said to stand for the proposition that “the automatic sanction for failing to receive proper authorization prior to changing any element of a water right is forfeiture upon accrual of the five-year period of such unauthorized use.” *Wood v. Trout* at 34. There are some changes in use that may result in forfeiture, as in *McCray* where the water right was not used for five years and the resumption of use defense failed because use was resumed on land to which the right was not appurtenant. Here, however, Troutt was using the water on the appurtenant land, his place of diversion was downstream from the decreed place of diversion, the pump was in the same ditch, and there was no evidence that injury to other water rights would occur because of the move. *Id.* at 35. The court noted its decision did not insulate Troutt from any sanctions that the department of water resources might wish to impose for the unauthorized change, but simply meant Troutt had not forfeited his water right.

Absent circumstances such as those in *McCray*, it is likely that an Idaho court would not find a water right forfeited because of an unauthorized change in point of diversion, place of use, or period of use. The sanctions afforded to the department of water resources in Idaho Code § 42-351 include providing notice of the violation in use of a water right and, if necessary, action for injunctive relief. If the legislature had contemplated forfeiture as a sanction for violation of §§ 42-222 or 42-108, it is likely it would have been stated more explicitly in the sanctions set out in § 42-351.

RE: Transfer No. 78483
Water Right No(s). 45-14377, 45-14379, 45-14381, 45-2363

Dear Applicant(s):

The Department of Water Resources has received your water right transfer application. Please refer to the transfer number referenced above in all future correspondence regarding this transfer.

A legal notice of the application has been prepared and is scheduled for publication in the **TIMES NEWS on 4/4/2013 and 4/11/2013**. Protests to this application may be submitted for a period ending ten (10) days after the second publication (**April 22, 2013**).

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the approval document.

Please contact this office if you have any questions regarding the application.

Sincerely,

Denise Maline
Administrative Assistant

Water Right No(s). 45-14377, 45-14379, 45-14381, 45-2363

Dear Mr. Higgs:

A copy of the above referenced application is enclosed. Please review the application, then complete the enclosed recommendation form and return it to this office within 21 days of the date of this letter.

If the application is approved, IDWR will include appropriate standard conditions of approval for a water right located within a water district, such as regulation by the watermaster, lockable controlling works, and/or measuring devices. Any special conditions or other concerns you have related to this application should be specifically addressed in your recommendation.

IDWR's regional offices can finish reviewing an unprotested application as soon as the protest period has past. Your prompt response to this request will ensure that your recommendation can be considered. If IDWR has not received your written recommendation within 21 days from the date of this letter, IDWR will presume that you do not oppose approval of the application and that you have no comments for IDWR to consider.

Sincerely,

Denise Maline
Administrative Assistant

Date Filed: 8/13/2012

Place Of Use: WILDLIFE AND WILDLIFE STORAGE

T07S R13E S23 SWSE SESE

This is a re-advertisement for Application for Permit 36-16948 to resolve a protest. Applicants propose to change the proposed point of diversion to a location further down the ditch, to address concerns expressed by the protestant. Application proposes diverting up to 6.0 cfs of waste water for wildlife use associated with an existing pond located approximately 1.0 mi. south of the city of Hagerman and west of HWY 30. The waste water has historically been delivered through a ditch from an existing fish hatchery located approximately 0.2 mi. south and 1.0 mi. east of the city of Hagerman.

NOTICE OF PROPOSED CHANGE OF WATER RIGHT

TRANSFER NO. 78482

CITY OF ALBION, PO BOX 147, ALBION, ID 83311; has filed Application No. 78482 for changes to the following water rights within CASSIA County(s): Right No(s). 45-14165. The purpose of the transfer is to change a portion of the above rights as follows: Application proposes adding a new point of diversion and modifying a permissible place of use for Marsh Creek irrigation water right owned by the City of Albion. The new point of diversion is located approximately 0.6 miles north and 0.6 miles east of the City of Albion and will allow for the diversion and irrigation of different land to facilitate land application of waste water as required by IDEQ. The existing and new point of diversion on Marsh Creek will be used to divert up to 0.91 cfs for irrigation of 37.8 acres within a proposed 83.1 acre permissible place of use.

NOTICE OF PROPOSED CHANGE OF WATER RIGHT

TRANSFER NO. 78483

HOWARD and KAREN ROBINSON, 2288 WILLIAMSBURG CIRCLE, WEST JORDAN, UT 84088; has filed Application No. 78483 for changes to the following water rights within CASSIA County(s): Right No(s). 45-14377, 45-14379, 45-14381 (Mill Creek); 45-2363 (Ground Water). The purpose of the transfer is to change a portion of the above rights as follows: Application proposes transferring a irrigation ground water right (1.0 cfs) from a farm located approximately 1.0-1.5 miles north and 0.5-1.0 miles east of the City of Oakley, to a farm located approximately 2.0-2.5 miles east and 0.25-0.9 miles north of the City of Oakley. The application will also modify the permissible place of use of three Mill Creek irrigation rights on the farm located approximately 2.0-2.5 miles east and 0.25-0.9 miles north of the City of Oakley. The ground water right (1.0 cfs) will be pumped from an existing well located approximately 0.4 miles north and 2.6 east of the City of Oakley.

NOTICE OF PROPOSED CHANGE OF WATER RIGHT

TRANSFER NO. 78422

MOSS LAND CO LLP, 390 N 925 E, DECLO, ID 83323; has filed Application No. 78422 for changes to the following water rights within MINIDOKA County(s): Right No(s). 36-2566. The purpose of the transfer is to change a portion of the above rights as follows: Application proposes to change the point of diversion (POD) and add a POD for a 3.82 CFS, (320 acres) irrigation water right, currently diverted from a well located approximately 6.4 miles north and 3 miles west of the intersection of State Highways 25 and 27 in Paul, ID. The new point of diversion will be located approximately 6.1 miles north and 2.9 miles west of the intersection of State Highways 25 and 27 in Paul. Application seeks to correct the described location of the existing well on the water right to the actual well location. The new POD sought by the application is to allow the applicants to drill a new well in order to withdraw the full diversion rate allowed by their water right because the existing well no longer supplies the full quantity.

Permits will be subject to all prior water rights. For additional information concerning the property location, contact Southern Region office at (208) 736-3033; or for a full description of the rights &/or proposed transfer, please see www.idwr.idaho.gov/apps/ExtSearch/WRFiling.asp. Protests may be submitted based on the criteria of Sec 42-222 and 42-203A, Idaho Code. Any protest against the approval of this application(s) must be filed with the Director, Dept. of Water Resources, Southern Region, 1341 Fillmore St, Suite 200, Twin Falls, ID 83301 together with a protest fee of \$25.00 for each application on or before April 22, 2013. The protestant must also send a copy of the protest to the applicant.

From: Benny Walker
Re: Evaluation of Sufficiency of Information Submitted

Application proposes transferring a supplemental irrigation ground water right (1.0 cfs) from a farm located approximately 1.0-1.5 miles north and 0.5-1.0 miles east of the City of Oakley, to a farm located approximately 2.0-2.5 miles east and 0.25-0.9 miles north of the City of Oakley. The application will also modify the permissible place of use of three Mill Creek irrigation rights on the farm located approximately 2.0-2.5 miles east and 0.25-0.9 miles north of the City of Oakley. The ground water right (1.0 cfs) will be pumped from an existing well located approximately 0.4 miles north and 2.6 east of the City of Oakley. Water right 45-2363 is currently combined with water from Oakley Canal Co. shares which are considered to be the primary water right on the place of use for ground water right 45-2363. It is proposed that the Mill Creek water rights 45-14377, 45-14379, and 45-14381 will be the primary water rights for the place of use for water right 45-2363 after approval of this transfer. The applicant submitted a 5 year analysis showing the average annual amount of acre feet provided by water right 45-2363. Water right 45-2363 will be limited to the 308 acre feet demonstrated by the analysis at the proposed place of use. The applicant's consultant submitted an e-mail indicating that right 43-2363 will be limited to 90 acres at the new place of use after the transfer (overall acre reduction and limiting the diversion volume to historical amount in the analysis). Water right 45-2363 is currently leased to the Water Supply Bank. The applicant proposes to remove this right from the bank upon approval of this transfer. The applicant submitted a ground water model analysis, which was checked by IDWR. This model analysis from the currently authorized point of diversion to the proposed point of diversion indicated no negative impacts to hydraulically connected reaches of the Snake River. The property and points of diversions involved with the application are located within the Water Districts 140 and 45A so water master comments will be necessary.

- **Authority to File:**
Applicant is listed as the current owner on IDWR records.
- **Water Right Validity:**
Water right 45-2363 was decreed in the SRBA on 5/6/2005, and placed in the Water Supply Bank 4/9/2012. Water rights 45-14377, 45-14379, and 45-14381 were decreed 1/8/2007.
- **Injury to Other Water Rights:**
None anticipated.
- **In Enlargement of Use:**
None anticipated. An overall acre reduction and limiting ground water diversion volume to historical amount.
- **Local Public Interest:**
Application will be subject to public notice and protest.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water.
- **Effect on Economy of the Local Area:**
No issues anticipated
- **Effect of the Agricultural Base of the Local Area:**
None anticipated.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

Walker, Benny

Subject: Water right 45-2363

Benny,

I have discussed the volume limit with Dutch and he feels that the 308.0 acre at 3.4 acre feet per acre for a total of 90.0 acres allowed to be irrigated is acceptable. Please processed with the transfer with an annual volume limit of 308.0 AFA for 45-2363.

Thank you,

Re: Water Right 45-2363

Dear Mr. Cranney:

I am assisting Dutch Robinson on a transfer that proposes to move supplemental ground water right 45-2363 to a combined place of use with Mill Creek water rights 45-14377, 45-14379 and 45-14381. You leased the farm from Dutch Robinson for a period of time and have a good understanding of how the farm is operated.

I have prepared an affidavit for you to sign regarding the application of ground water to the farm. The affidavit will have to be notarized by some authorized to do so. Please review the affidavit and sign it.

Please mail the signed original affidavit to Brockway Engineering. If you have any questions about the affidavit, please give me a call and we can discuss it.

Sincerely,

Greg Sullivan, M.S.

Re: Application for transfer water right 45-2363

Dear Mr. Walker:

Your letter dated February 11, 2013 identified several issues or concerns that IDWR has with the proposed transfer that will move the POD and POU of water right 45-2363. This letter intends to address each of your concerns.

Water right 45-2363, along with many other water rights, was sold by D&N Ranch to PKD Properties in December of 2010. In March of 2012, PKD Properties quit claimed 45-2363 to Howard and Karen Robinson. No land was quitclaimed to the Robinson's at that time. The documents supporting these transactions can be found on the IDWR water right database in the document section of 45-2363.

ESPA Model analysis was performed for the proposed change of POD for 45-2363 by modeling the decreed POD in cell 98037 to the proposed POD in cell 100038. A volume of 424.5 afa was historically modeled and a volume of 360.0 afa was modeled at the new POD. The difference in volume amount is due to the 25.0 acres that will no longer be irrigated. The model analysis indicates that no mitigation will be required as a result of this transfer.

The decreed POD for 45-2363 has not been functional for many years. Water for 45-2363 has been diverted from two other PODs located at Township 14 South Range 22 East Section 3 NENENE and SESENE. The distribution system from the wells conveyed the ground water to the decreed POU of 45-2363.

The two wells in Section 3 have provided and continue to provide water to multiple water rights for multiple owners and multiple POUs. The well located in the SESENE has a long standing dual ownership agreement documented by IDWR. Previous and current owners include D&N Ranch, Manning, PKD Properties, Mathews, Cranney and Robinson. Water rights diverted from the two wells located in Section 3 include 45-14143, 45-14155,

Water Resources

45-14385, 45-14386, 45-14387, 45-14388, 45-14389, 45-14390, 45-1439, 45-14392, 45-14399 and 45-14400. There are multiple POU's associated with the water rights diverted from the two wells located in Section 3. Additionally, the pipe distribution system for the different farms co-mingles the ground water with surface water from Oakley Canal Company, Birch Creek and Mill Creek.

A one page portion of the agreement between owners of the two wells is attached to this letter. Brockway Engineering received this one page document on June 22, 2011. The agreement discusses Landlord and Tenant privileges and responsibilities. Jeanie Roberts, former employee of IDWR, worked extensively with Dutch Robinson and the Manning family concerning this agreement.

Power records for these two wells are attached for the years that Dutch Robinson was billed for the electrical consumption from these two wells. It will be difficult to determine the amount of water diverted and the location of application of the ground water under any of the fore mentioned water rights. The affidavits signed by Howard Robinson and Nathan Robinson are the best available records of ground water application of 45-2363.

Layne Pump has performed maintenance on one of the two pumps and documentation of the repair work is attached to this letter. An aerial photograph of the place of use of 45-2363 in 2004 shows that alfalfa was the crop and the place of use is being irrigated by the pivot. Based on the Google Earth timeline, this photograph was taken September 26, 2004. During 2004, the Oakley Canal Company only allotted 11.0 acre inches per share because lack of surface water availability. The water provided by the Oakley Canal Company would have been consumed before the month of September.

Attached to this letter is an IDWR Memo from Ann Yribar concerning "Forfeiture and Unauthorized Use of a Water Right". I believe this Memo provides sufficient guidance relative to a none forfeited stance of 45-2363 and the use of a none approved change in point of diversion.

The intent of this transfer is to allow beneficial use 45-2363, 45-14377, 45-14379 and 45-14381. Water right 45-2363 is a supplemental ground water right that cannot be utilized without a primary water right. Water rights 45-14377, 45-14379 and 45-14381 alone cannot provide sufficient annual water supply to the three proposed pivots to obtain a financial profitable crop. The Robinson's will give a total of 25.0 acres of primary Mill Creek water and

Water Resources

supplemental ground water back to the State of Idaho if this transfer is approved. The 25.0 acres are not required for mitigation.

The Idaho Department of Water Resources is required to "evaluate whether there would be injury to other water rights, there would be an enlargement in use of the original right, the proposed use would be a beneficial use, the proposed use would be in the local public interest, the proposed use would be consistent with the conservation of water resources within the State of Idaho, and whether the proposed change would impact the agricultural bases of the local area" *Transfer Processing Memo No. 24*. This transfer will not injure other water rights. This transfer will not enlarge the original water rights. The beneficial use of the water rights will continue as decreed in the SRBA. The local farming community will benefit from this transfer. The proposed use is consistent with conservation use of water within the State of Idaho and will decrease the volume of water diverted from the States water sources. This transfer will improve the agriculture base of the local area.

No changes have been made to the original transfer application that was submitted on February 6, 2016. Therefore, a new signature by Dutch and Karen Robinson has not been obtained.

If you have any additional questions regarding this transfer please give me a call.

Sincerely,

Greg Sullivan, M.S.

Twin Falls, ID 83301

Gentlemen:

Our office recently received a water right transfer applications that you submitted on behalf of Howard and Karen Robinson. The transfer application deals with groundwater right 45-2363 and surface water rights 45-14377, 45-14379, and 45-14381 and seeks to create a permissible place of use and change the point of diversion for the groundwater. In addition the transfer proposes to reduce the amount of irrigated acres of all water rights. However, a recent review of the transfer applications revealed issues and/or incomplete items that make the application unacceptable for processing. As a result, we are returning the transfer applications and the filing fees of \$500.00 (Brockway Engineering check # 11245).

The application indicates that the land in which water right 45-2363 is currently applicable has been sold and ownership of this right was retained by Howard and Karen Robinson. The department requests a copy of the deed that shows the Robinsons sold the land without water and that they retained water right 45-2363 in order to transfer this water right to other lands.

For applications that propose changing the point of diversion of a water right to divert and use ground water from one location to another within the Eastern Snake Plain Aquifer (ESPA) including any modeled tributary aquifers, the applicant must submit an attachment with the application that sets forth the time series of calculated depletions (transient to steady-state) to reaches of the Snake River that are hydraulically-connected to the ESPA using or based on the department's current ground water model for the ESPA, or other equivalent analysis acceptable to the department. No such analysis was included with the application. Note that if the analysis shows increased depletions greater than 10% to any reaches of the Snake River, the depletions are assumed to cause injury and must be fully mitigated.

Page 2
Robinson Transfers Letter
February 11, 2013

The analysis relating to the past use of the supplemental ground water right is based off of an estimate of crop needs, delivery of Oakley Canal Company water, and the assumption that the difference between the crop needs and canal company delivery was provided by ground water. The department request copies of power records documenting the amount of water diverted from the point of diversion for water right 45-2363 to verify the analysis and assumptions submitted by Brockway Engineering.

In addition the fee submitted with the transfer is insufficient. The department requires an additional \$80.00 for the proposed consolidation of the surface water used for irrigation by permanently reducing the number of acres authorized for irrigation under these water right(s), while maintaining the original diversion rate or annual diversion volume.

If you have any questions, or if I can be of any further assistance, feel free to contact me at your convenience.

Sincerely,

A handwritten signature in cursive script that reads "Benny Walker".

Re: Application for transfer water right 45-2363

Dear Mr. Merritt:

Howard and Karen Robinson desires to add water right 45-2363 to an existing PPU, changing the point of diversion and place of use of this ground water water right. Howard and Karen Robinson are the owners of water right 45-2363 which is currently leased into the water supply bank as of 4/9/2012 and will be withdrawn from the water supply bank upon approval of this transfer. The lands in which 45-2363 is currently applicable to, have been sold and ownership of this water right was retained by the Robinsons. Water right 45-2363, 45-13477, 45-14379 and 45-14381 combined limits for acres will be decreased from 115.0 acres to 90 acres within the 130.8 acre PPU. An increase in volume/flow rate per acres is what the Robinson's would like to achieve through this transfer.

Historical supplemental use has been examined relating to 45-2363 and the Oakley Canal Company (See Attachment 8B). Affidavits from Dutch Robinson and Nathan Robinson state that ground water was only applied on the pivot when Oakley Canal shares were no longer available. The analysis indicates that 45-2363 has historically been utilized as a supplemental water right and the proposed use as defined in this transfer is similar to historical use. Under the proposed transfer, 45-2363 would remain a supplemental water right and would only be used when surface water from Mill Creek is no longer available.

The excess 25.0 acres of Mill Creek water and ground water will off set any negative affects this transfer may have on local Mill Creek and ground water rights.

Water right 45-11747 which is also owned by the Robinson's, is a stockwater right that currently overlaps the proposed PPU and point of diversion that is sought for 45-2363.
